TADS
& ALIGNERS

Do you want to treat all your patients with aligners?

But before you set yourself this goal, ask yourself: can all cases be solved with aligners? If you already work with them, you will know their virtues to perfection, but you will also have experienced their limitations: molars that do not straighten, distalisation that does not occur... Some movements are complicated or practically impossible to achieve with aligners alone.

For this reason, auxiliary techniques are a fundamental complement if you want to tackle any case, however difficult it may be, with guarantees of success.

Lack of habit is one of the "brakes" we have when using these techniques. For example, the fear of inserting micro-screws, the doubts that arise about when they are necessary or which are the best areas for their insertion? The best antidote against insecurity is practice and knowledge. That is why we have created an event where you can learn absolutely everything about TADs.

Discover all the possibilities offered by these techniques from the best international top-level speakers with extensive experience in invisible orthodontics.

What more could you ask for?

APRIL 3

9:30 ACCREDITATION DELIVERY

10:00-11:00

Mini-tubes workshop
Dr. Luis González

Dr. Luis González

COFFEE BREAK

11:30-13:30

- Less than 3 months: Full refund of the amount to be spent on a company product.
- Less than 1 month in advance: No refund.

The image features the SAS logo, which consists of the lowercase letters 'sas' in a white, sans-serif font, with a white curved line underneath that resembles a smile. The logo is centered in the upper half of the frame. The background is a scenic photograph of a beach at sunset. The sky is filled with soft, orange and yellow clouds, transitioning into a deep blue at the top. The sun is low on the horizon, casting a warm glow over the scene. In the foreground, there is a sandy beach on the left, a rocky shoreline in the middle, and the calm blue water of the sea on the right. A tall palm tree stands on the left side of the beach, and a street lamp is visible nearby. In the distance, there are silhouettes of mountains and some buildings along the coast.
