Victorian Skating Rink

Create Your Very Own Victorian Winter Wonderland with Sara & Friends

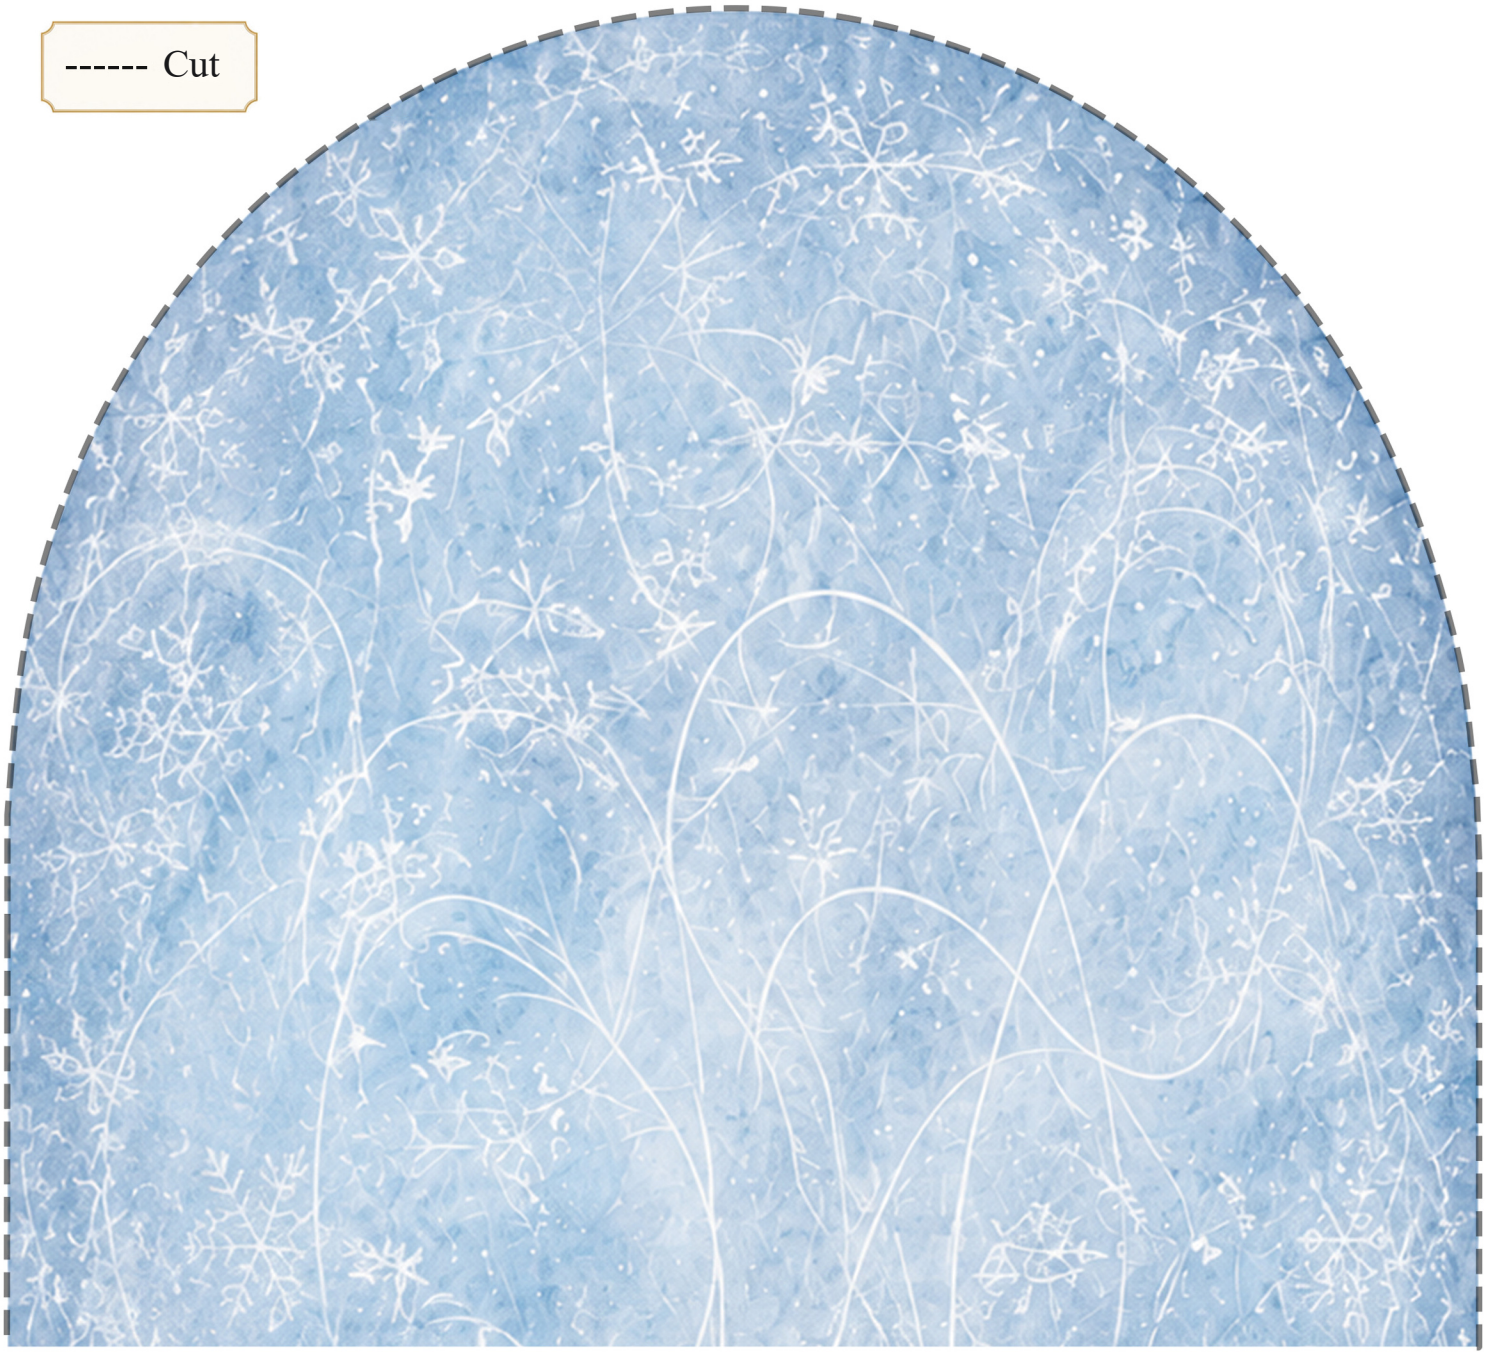

Instructions

Cut out both rink halves along the dashed outer lines. On the half without the white joining flap, cut along the straight bottom edge where the blue ice meets the white page. This edge has no dashed cutting line.
Keep the white joining flap attached to the other half.
Apply glue to the white flap, then slide the flap underneath the other rink half.
Align the ice edges and press the halves together.

JOIN THE RINK

1. Cut out both rink halves along the dashed outer lines. On the half without the white joining flap, cut along the straight bottom edge where the blue ice meets the white page. This edge has no dashed cutting line. Keep the white joining flap attached to the other half.
2. Apply glue to the white flap.
3. Slide the flap underneath the other half.
4. Align the ice edges.
5. Press the halves together firmly.

The white flap always stays hidden underneath.

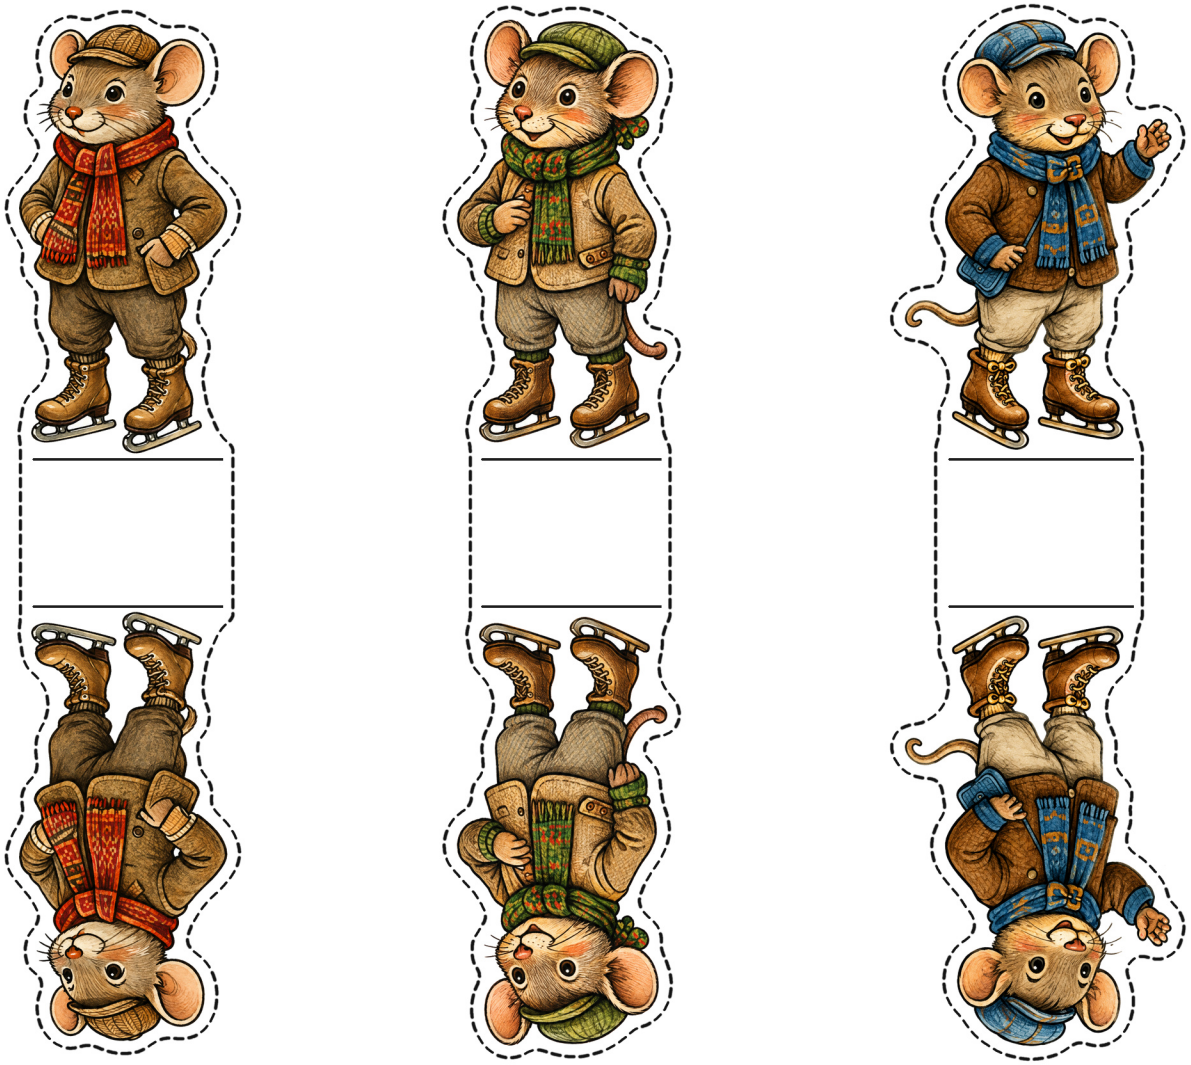

Keep the flap attached and apply glue.

Align & press flat

These craft pages are also available as a digital download through Dr. Lovejoy's website.

—— Fold ------ Cut

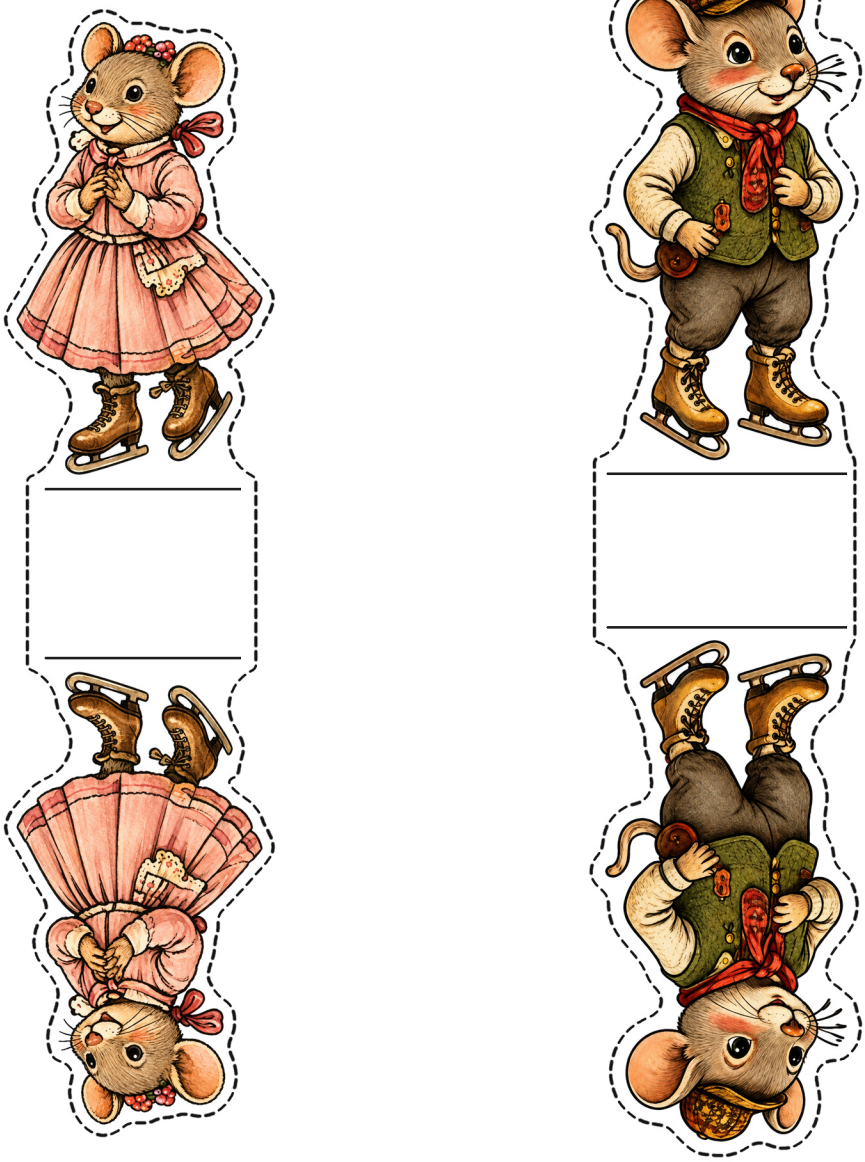

WHAT YOU'LL NEED

- Scissors (child-safe scissors for young crafters)
- A permanent glue stick (a wrinkle-free type works best)
- Optional: thin, clear double-sided tape

HELPFUL TIPS

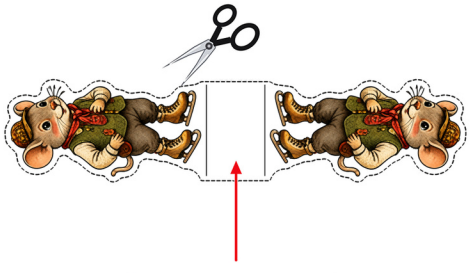

- *Spread the glue in a thin, even layer so the paper stays flat.*
- *Double-sided tape gives a flat, mess-free join.*
- *Printing the digital templates at home? Use white matte cardstock, 65–80 lb (176–216 gsm).*

—— Fold ------ Cut

1 CUT

Cut along the outer dashed line. Keep both printed halves joined by the rectangular base. Do not cut the solid fold lines.

Keep the base attached.

2 FOLD

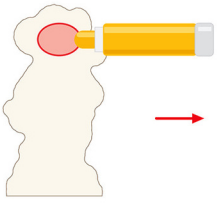

Fold along both solid lines. Raise the two halves with printed sides facing outward and blank sides facing inward.

The base stays flat on the table.

3 GLUE & PRESS

Apply a little glue to the blank side at the location shown. Bring the two halves together and press at the glued area. Leave the rectangular base and the lower parts of the halves unglued so the piece can stand.

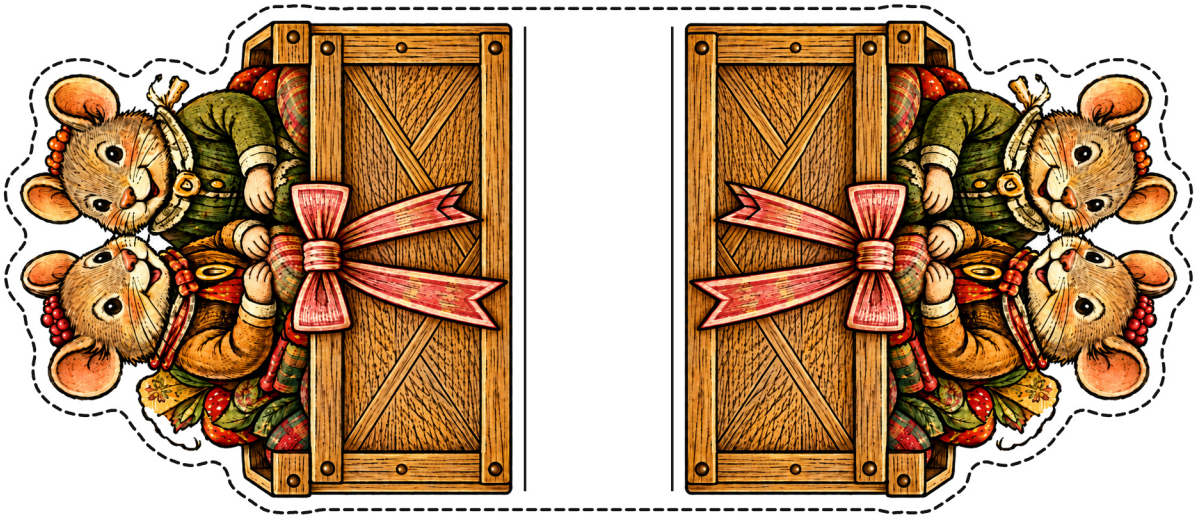

Glue behind the head.

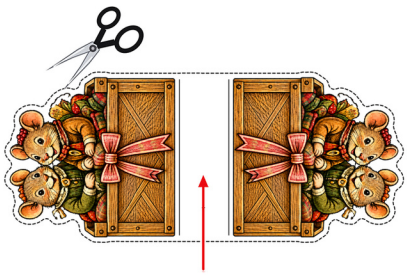

Don't glue the bottom.

—— Fold ------ Cut

1 CUT

Cut along the outer dashed line. Keep both printed halves joined by the rectangular base. Do not cut the solid fold lines.

Keep the base attached.

2 FOLD

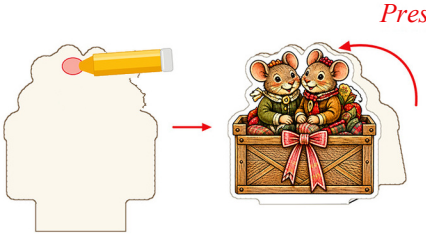

Fold along both solid lines. Raise the two halves with printed sides facing outward and blank sides facing inward.

The base stays flat on the table.

3 GLUE & PRESS

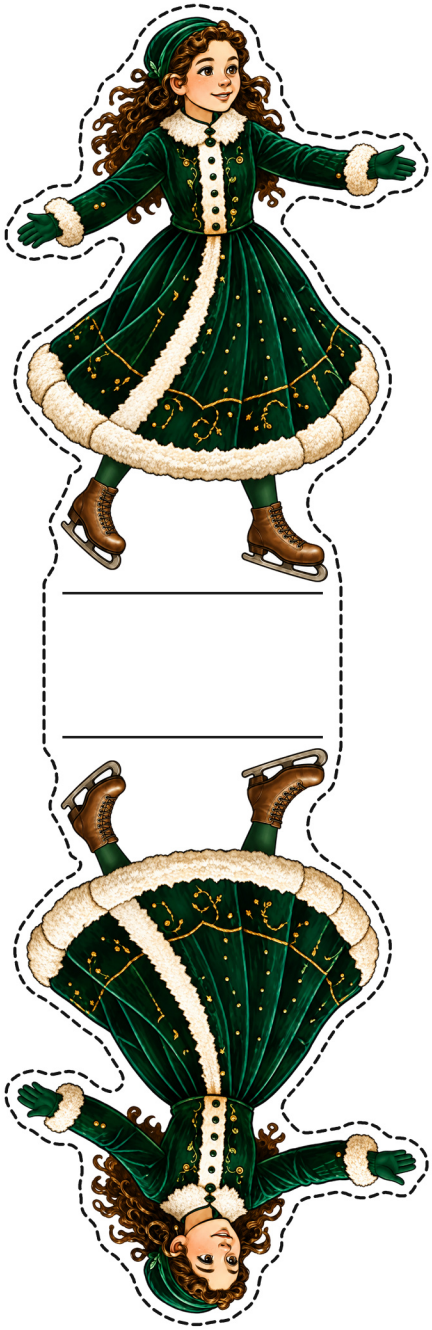

Apply a little glue to the blank side at the location shown. Bring the two halves together and press at the glued area. Leave the rectangular base and the lower parts of the halves unglued so the piece can stand.

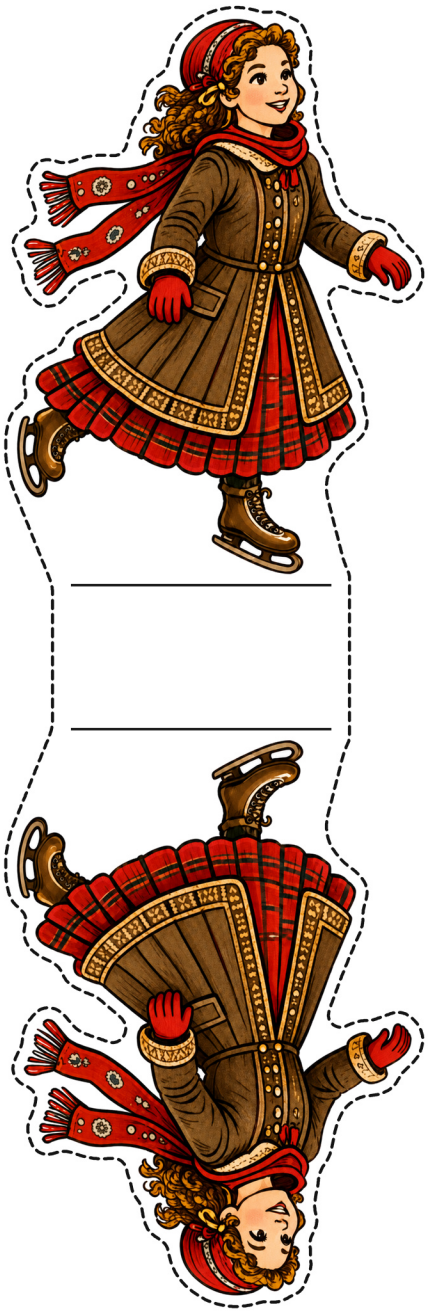

Apply a little glue to the blank side behind the mice's heads.

Don't glue the bottom.
