

WELCOME!

Ultimate VIP Pre-Day Classes

These will be live Zoom classes – approximately 3 hours. Students will receive supply lists prior to class, with plenty of time to assemble supplies.

Also, photographs shown are representative of the project & may or may not be the actual project taught in class.

FLORAL SHADOW BOX

Taught by Barbara Foster

Spring and summer are seasons for flowers, and a flower-filled shadow box is a perfect way to bring beauty into your home or provide an exquisite gift for a friend or family member. In this LIVE class, you will learn to determine appropriate sizing for the flowers.

We will cut, color, form and contour the flowers, making enough to fill the shadow box frame. In addition, an adhesive vinyl saying will be sized, cut, weeded and applied. The cutting in this class is both Cameo and Portrait compatible.

RHINESTONE DECALS

Taught by Libby Ashcraft

It's all about the bling!! Usually, rhinestones are pressed onto garments and other fabric blanks.

However, rhinestones are not just for fabric anymore! Whether it is a mug, car window, laptop, cell phone, case, or crafts -- this special material from "The Rhinestone World" is a game changer.

We will review the Rhinestone Panel in Silhouette Studio & tips for working with Rhinestones. Then we will take materials that are normally intended for apparel and press them to "Bling Anything Decal" material for a quick, easy, peel-and-stick decal! Before you know it, you will have bling on everything!

SKETCH PEN & SKETCH DESIGN CLASS

CREATING IN THE SILHOUETTE STUDIO SOFTWARE

Join Elly Mae with Silhouette Secrets+ in this live 3-hour class to learn all about sketch pens & creating sketch designs. We will discuss different pen styles, adapters, sketch designs, fonts, filling designs, and troubleshooting too.

In Elly's hands on class, you will have fun, and play with this neat sketching feature in the Silhouette software.

We will be doing some testing, demos, and finished projects too! At the end of the class, you will have a better understanding of what works and doesn't work for sketching with your Silhouette machine. (This class can be completed with a Portrait, Cameo, or Curio machine.

A class supply list will be provided to attendees prior to the event

SILHOUETTE STUDIO FOUNDATIONS

Taught by Terri Johnson

If you are new to owning a Silhouette CAMEO, or just want to learn more about how to use the Silhouette Studio software to create your own unique designs and projects, then join us for this 3-hour live class to learn the ins & outs of Silhouette Studio V4 – all while creating your own designs!

This class will take you from some of the most beginner questions to some more advanced features – so that you can understand how to use it – and get more out of the upcoming ATS classes over the weekend.

SOME OF THE TOPICS TO BE DISCUSSED IN THE CLASS:

- How to use Page Set-Up Panel
- Preferences
- File Types you can use in Silhouette Studio
- Cut Lines Explanation
- Downloading and Adding Fonts to Silhouette Studio
- Working with Text – Weld, Text on a Path & more
- What exactly are Group, Ungroup & Compound Path – and how to use them
- Using the Drawing Tools, Knife, Tool and introduction to Point Editing
- Exploring the Transform, Replicate & Offset Panel
- Overview of the Send Panel & Adding Custom Materials

As we work through these software tools & features, you will be creating your own design. And then, you will actually be able to cut & apply your own design! Designer Edition is recommended, but NOT required for this class.
