

The CURIOSITY *theory*

Martin Lopez

Speaker, Author, Trainer and Coach

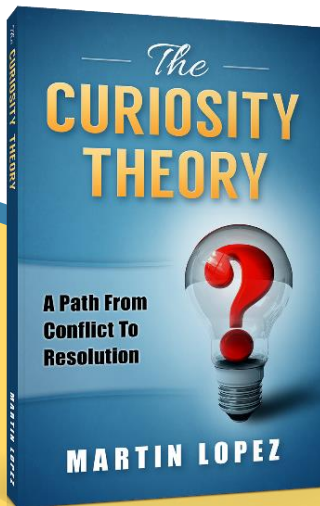

Martin Lopez is an emerging Speaker, Author, Trainer and Coach in the personal development industry. His book *The Curiosity Theory* is a powerful methodology that radically changes the way we look at life, the way we look at ourselves and the way we look at each other.

Martin's gift is strengthening professional and personal relationships by applying curiosity thus improving communication and collaboration at a fundamental level. Curiosity helps teams work together more openly and efficiently. It brings companies, colleagues, couples and families closer together.

During his 30+ years in business, Martin has seen opportunities lost due to misaligned energy, conflict and self-sabotaging communications. Almost every time, the issues were fixable:

- Simple misunderstandings
- Personal disagreements
- Fear-driven distrust

The Curiosity Theory is the culmination of Martin's search for answers on how to transform the tension and destruction he found in conflict into connection, creativity and results.

The Curiosity Theory is about creating peak performance in all your relationships. It is about achieving the results and success in life that really matters to you.

Applied curiosity is the glue that binds business, family and all personal relationships together. It deepens communication and focuses on what truly motivates you, your teams, organizations, and customers. The Curiosity Theory provides a positive and productive framework to better manage your personal and professional encounters.

Workshop

The Curiosity Theory for Sales is a one-day interactive workshop, that provides professional sales people with alternative means of viewing how they interact and connect with prospects, customers and colleagues.
