Building Committee Update

October 2021

The PCC board of directors has approved the final plans submitted by the Building Committee. Those plans were submitted to the Palmas Architectural Review Board and were approved for construction.

A full set of construction drawings are being completed to submit to contractors for bids. Those drawings should be completed by November 1, 2021. A short list of contractors has been identified and will be sent the bid package. The expectation is to have final bids by January 30, 2022 and choose a builder for the new facility by March 1, 2022 and award them the bid.
