DENTAL MEDICINE

Scholar Society

Course title:

Implementation, Patient Education and Lines of Service

Course Description:

I will lead this session to discuss a system for patient education and treatment, including services and fees. I will ask a panel of our speakers to discuss how they have specifically implemented IDM in their practices.

Learning objectives:

1. Each participant will learn a system for educating and evaluating patients for the 3 pillars of IDM
2. Each participant will learn new lines of service in their clinical practice using the IDM model
3. Each participant will learn about medical coding for IDM related tests and procedures
