## Description of Services

### RiskFit® Essentials

Every policyholder, no matter the size or setting, deserves the opportunity to reduce risk, improve performance, and get on-demand advice for avoiding lawsuits and professional liability claims. Promote and protect your business with RiskFit® Essentials. OmniSure's Helpline for Advice-on-Demand is answered live, 24 hours a day, 7 days a week. In addition, clients get monthly RiskTips by email that include videos, podcasts, and checklists. For those who set up a username and password at your brand-specific online resource center, RiskFit® Essentials programs will take policyholders through a setting-inspired, do-it-yourself consultative journey toward RiskFitness® which ultimately results in a RiskFit® Certificate and the opportunity to download risk-specific tools and resources.

### Desktop Risk & Quality Review

OmniSure's seasoned clinical risk consultants with deep setting-specific expertise specialize in rooting out pertinent information and supporting clients with recommendations to reduce risk and avoid losses. The Desktop Risk & Quality Review starts with a review of available external information, including the application, loss runs, survey history, website, online reviews, and other data. This is followed by a telephonic interview and best practices consult, which can reveal a lot about a policyholder's risk exposures, dedication to risk management, and opportunities for improvement. The Desktop Risk & Quality Review results in an Executive Summary, Recommendations, and an Internal Report, and automatically comes with RiskFit® Essentials to support the policyholder throughout the policy period.

### OnSight® Risk & Quality Review

Sometimes you don't know what you aren't seeing until a trusted set of outside eyes gives you a first-hand report. OmniSure's got you covered. First, OmniSure's seasoned clinical risk consultant with deep setting-specific expertise roots out pertinent information in the Desktop Risk & Quality Review. Then, a clinician tours the facility and conducts a brief focused review of clinical processes, documentation, data, or files determined by the consultant's desktop review. The OnSight® Risk & Quality Review results in an Executive Summary, Recommendations, and a Confidential Internal Report for the Underwriter. As with all services provided by OmniSure, it automatically comes with RiskFit® Essentials to support the policyholder throughout the policy period.

### Pandemic-Responsive OffSight™ Risk Assessment

Now more than ever you don't want to leave the important stones unturned but because putting a Clinical Risk Specialist on a plane to spend a full day onsite isn't currently feasible, our Pandemic-Responsive OffSight™ Risk Assessment can be just what the underwriter ordered. This assessment goes into significantly greater detail than the stand-alone OnSight® Risk & Quality Review in order to identify risks, starting with Infection Control and Pandemic Preparedness, and provide clients with an in-depth list of recommendations. Using a combination of interviews and offsite reviews of policies, procedures, and facility practices, the consultant reports on risks, gives clients client-specific recommendations and provides as much guidance as possible. **Either a clinician tours the facility and conducts a brief focused review, as determined by the Clinical Risk Specialist, once the pandemic-related restrictions are lifted, or a Clinical Risk Specialist does a telephonic/desktop progress review prior to renewal.** The Pandemic-Responsive OffSight™ Risk Assessment results in a Confidential Internal Report for the Underwriter. As is OmniSure's universal standard, this service automatically comes with RiskFit® Essentials to support the policyholder throughout the policy period.

### Comprehensive OnSight® Risk Assessment

For underwriters who are truly serious about managing their book of business and are in a position to command the necessary premium to make that happen, the Comprehensive OnSight® Risk Assessment will help you master the market. Your seasoned clinical risk consultants with setting-specific expertise will not only go deep to identify and address risks during the full-day detailed onsite inspection, but they will also consult along the way, resulting in the best possible recommendations and prioritized action plan to avoid claims and prevent lawsuits. RiskFit® Essentials is also included, of course! Can we answer your technical and clinical risk questions along the way? Yes, we can! It's what we do!
