Description of Services

Pre-Bind Underwriter Risk Report

A Pre-Bind Underwriter Risk Report includes a review of the client's website, online reviews, regulatory and survey data, claims history analysis, application and submission information, and underwriting questions, and a confidential summary for the underwriter. Let us ensure you write good risks!

RiskFit® Essentials

No matter the size or setting, every policyholder deserves the opportunity to reduce risk, improve performance, and get on-demand advice for avoiding lawsuits and professional liability claims. Promote and protect your business with RiskFit® Essentials. OmniSure's Helpline for advice-on-demand is answered live, 24 hours a day, 7 days a week. RiskFit® Essentials programs will take policyholders through a setting-inspired, do-it-yourself consultative journey toward Risk Fitness®, which ultimately results in a RiskFit® Certificate and the opportunity to download risk-specific tools and resources. In addition, clients get monthly RiskTips by email that include videos, podcasts, and checklists.

TeleRisk™ Consultation

OmniSure's seasoned clinical risk consultants with deep setting-specific expertise specialize in rooting out pertinent information and supporting clients with recommendations to reduce risk and avoid losses. The TeleRisk™ Consultation starts with a review of available external information, including the application, loss runs, survey history, website, online reviews, and other data. This is followed by a telephonic interview and best practices consultation, which can reveal a lot about a policyholder's risk exposures, dedication to risk management, and opportunities for improvement. The TeleRisk™ Consultation results in a confidential summary for the underwriter, as well as a report with recommendations for the policyholder, and automatically comes with RiskFit® Essentials to support the policyholder throughout the policy period.

OffSight™ Risk Assessment

Now more than ever, you don't want to leave the important stones unturned. Our OffSight™ Risk Assessment can be just what the underwriter ordered. This assessment goes into significantly greater detail than the stand-alone TeleRisk™ Consultation to identify risks, starting with infection control, and provide clients with an in-depth list of recommendations. Using a combination of interviews and offsite reviews of policies, procedures, and facility practices, the consultant reports on risks, giving policyholders client-specific recommendations. The clinical risk specialist also engages in a video tour of the facility. The OffSight™ Risk Assessment results in a confidential summary for the underwriter. As is OmniSure's universal standard, this service automatically comes with RiskFit® Essentials to support the policyholder throughout the policy period.

Comprehensive OnSight® Risk Assessment

For underwriters who are truly serious about managing their book of business and are in a position to command the necessary premium to make that happen, the Comprehensive OnSight® Risk Assessment will help you master the market. Your seasoned clinical risk consultants with setting-specific expertise will not only go deep to identify and address risks during the full-day detailed onsite inspection, but they will also consult along the way, resulting in the best possible recommendations and prioritized action plan to avoid claims and prevent lawsuits. RiskFit® Essentials is also included, of course! Can we answer your technical and clinical risk questions along the way? Yes, we can! It's what we do!
