# Contents

<b>1</b>	<b>Getting Started</b>	<b>7</b>
1.1	Components . . . . .	7
1.2	Requirements . . . . .	7
1.3	Install necessary packages . . . . .	7
1.4	Launching the dashboard . . . . .	8
<b>2</b>	<b>Getting the Data</b>	<b>11</b>
2.1	Reading in the data into a pandas DataFrame . . . . .	11
2.2	Naming conventions . . . . .	11
2.3	Downloading the data . . . . .	12
2.4	Saving the data locally . . . . .	14
<b>3</b>	<b>Data Cleaning and Transformation</b>	<b>17</b>
3.1	Selecting the correct columns . . . . .	17
3.2	Updating area names . . . . .	19
3.3	Aggregate repeating areas . . . . .	20
3.4	Transposing the data to time series . . . . .	21
3.5	Finding and handling bad data . . . . .	22
3.6	Data preparation complete . . . . .	26
3.7	Encapsulate all steps into a single class . . . . .	26
<b>4</b>	<b>Data Smoothing</b>	<b>27</b>
4.1	Smoothing the data . . . . .	27
4.2	Smoothing methods . . . . .	29
4.3	LOWESS . . . . .	34
<b>5</b>	<b>Exponential Growth and Decline Modeling</b>	<b>37</b>
5.1	Exponential growth and decline . . . . .	37
5.2	Modeling total deaths with scipy's <code>curve_fit</code> . . . . .	38
5.3	Modeling exponential decline . . . . .	43
5.4	Modeling growth rate as a function of time . . . . .	48
5.5	Modeling with smoothed data . . . . .	49
5.6	Exponential Function Summary . . . . .	52
<b>6</b>	<b>Logistic Growth Models</b>	<b>55</b>
6.1	Asymptotes . . . . .	55
6.2	S-Curves . . . . .	56
6.3	Estimating logistic function parameters . . . . .	60
6.4	Modeling the growth rate as a function of time . . . . .	65
<b>7</b>	<b>Encapsulation into Classes</b>	<b>71</b>
7.1	Make predictions for all areas for deaths and cases . . . . .	74

7.2	Combine predictions with actual data	75
7.3	Add USA to world tables	75
7.4	Creating a single table to store results	76
7.5	Create summary table	78
7.6	Create class to make all predictions	79
7.7	Classes written in python files	82
<b>8</b>	<b>Running the Workflow</b>	<b>83</b>
8.1	Running the workflow from the command line	84
<b>9</b>	<b>Visualizations with Plotly</b>	<b>85</b>
9.1	Plotly vs Dash	85
9.2	Introduction to Plotly	85
9.3	Plotly Figure Object	86
9.4	Creating a figure with multiple traces	90
9.5	Creating subplots	92
9.6	Adding annotations	95
9.7	Choropleth maps	96
9.8	Plotly Summary	102
9.9	More to Plotly	103
<b>10</b>	<b>Intro to HTML and CSS</b>	<b>105</b>
10.1	What is a web page?	105
10.2	Intro to HTML	105
10.3	Writing HTML in the notebook	106
10.4	Examples of common elements	107
10.5	HTML Syntax	110
10.6	Block vs Inline elements	111
10.7	Styling with CSS	112
10.8	CSS properties	112
10.9	Applying CSS using tags as selectors	112
10.10	Shorthand property names	114
10.11	Selecting elements by class and id	114
10.12	Changing block to inline	115
10.13	Page layout with Flexbox and Grid	117
10.14	CSS Flexbox layout	119
10.15	CSS Grid layout	122
10.16	Much more to HTML and CSS	125
<b>11</b>	<b>Building the Dashboard with Dash</b>	<b>127</b>
11.1	Parts of a dash application	127
11.2	Beginning a dash application	128
11.3	HTML elements in dash	128
11.4	Creating a data table	129
11.5	Dash core components	134
11.6	Adding plotly figures with <code>dcc.Graph</code>	135
11.7	Adding the maps	142
11.8	Adding radio buttons above the map	143
11.9	Interactivity using callbacks	145
11.10	Callback to change the map	149
11.11	Differences between this tutorial and <code>dashboard.py</code>	150
11.12	Dash Summary	150

<b>12 Deployment</b>	<b>153</b>
12.1 What is a web server? . . . . .	153
12.2 Python Anywhere . . . . .	154
12.3 Deploying on Ubuntu with Vultr . . . . .	158
12.4 Summary of all commands . . . . .	165
