

## Integrated Structured Circular Implementation Approach

Our IS-CIA approach is especially helpful for those companies and organisations who are looking for a way to integrate circular procurement in their processes or take circular procurement to the next level.

### 1) CIRCULAR VISION, MISSION AND AMBITION

What are the short, mid and long-term ambitions and how can we help you convert them into objectives and KPI's?

### 2) CIRCULAR PROCUREMENT

Based on the six steps of procurement, applicable requirements can be defined and provided to support the transition.

### 3) CIRCULAR VALUE CHAIN

When increasing the level of circularity across an organisation or value chain, various circular business models can be applied. The most relevant ones will be applied in this model.

### 4) CIRCULAR DESIGN

Design should be the outcome of a process that safeguards that functionality through choices in selection of materials, design principles for repair / (dis) assembly / sustainability
