

Firmware Installation Instructions for KT-400

After the download, extract the contents of the zip file (.bin, .kce and .txt file) to the FIRMWARE folder of your system installation.

To install the firmware with EntraPass:

1. Specify the firmware's directory from the Options\System parameters\Firmware\KT-400 tab
2. From the Operation\Controller screen, highlight the desired controllers and press the Reload Firmware icon.

If you have any questions before reloading controller firmware please contact Kantech Technical Support.
