

# InTouch Cardiology Solution

Cardiovascular disease is the number one cause of death in the United States.<sup>1</sup> As the number of patients with heart disease increases,<sup>2</sup> access to available cardiologists decreases.<sup>3</sup> Facilitate increased patient engagement, improved outcomes, and keep patients close to home by expanding the regional presence of cardiology specialists with virtual care.

## THE OPPORTUNITY

Through the use of telehealth, cardiologists can provide remote coverage for clinics, urgent care centers, and emergency departments. Real-time remote access to cardiology services in locations that currently lack specialists ensures your patients are treated in their local communities. Additional specialist resources can also help to minimize burnout and the on-call burden on your existing providers.

- **Elevate your brand with next-generation technology:** Build your regional presence and extend cardiology services to outlying locations.
- **Virtualize and scale care delivery:** Enable immediate access to cardiology specialists to shorten time to treatment, drive best practices, and improve outcomes.
- **Treat patients in the appropriate care setting:** Keep patients close to home and within your system, reducing inessential travel and avoiding expensive, unnecessary transfers.

## Virtual cardiology care drives results\*

-  **180%** return on investment
-  **Less than 20 minutes** response time
-  **74%** patients kept in community
-  **96%** patient satisfaction

With intuitive devices, easy-to-use software, and physician coverage options, the InTouch Cardiology Solution gives you everything you need to start, enhance, or expand your virtual cardiology offering—all on a single platform.

- **Improve outcomes:** Provide remote cardiology support for even the most complex cardiac patients with purpose-built devices.
- **Increase access to care:** Supplement your services for both acute and general cardiology with InTouch Physician Capacity Management.\*\*
- **Trusted by the world's best:** InTouch Health is reliable and secure, with configurable software modules proven to work in any clinical situation.

## InTouch Operating System

Built on our cloud-based network, with simplicity at its core, the InTouch OS creates a seamless experience across web, mobile, or desktop. The InTouch OS enables software and devices to bring the ease and familiarity of face-to-face care to your patients.

## InTouch Analytics

Collect data to discover actionable insights and drive measurable results

## InTouch Coordinator

See more patients without the inefficiencies and frustrations that can accompany scheduled telehealth

## InTouch Devices

Facilitate virtual care when and where you need it with purpose-built devices for both high and low-acuity care environments
