Dear Sir or Madam,

We would like to thank you very much for your interest
in our lighting product range.

The stated prices are recommended sales prices in euros
not including VAT.

If you have any questions about our products, delivery
times or custom-made items, please do not hesitate to
contact us.

Your customer no.: _____

Kind regards,

Your **betec** lighting-manufacturer

betec[®] Lighting AG
Felix-Wankel-Str. 10

Lighting Manufacturer

True to its company slogan – Light for the Future® – betec has enjoyed an excellent international reputation as an innovative lamp manufacturer for 40 years.

Its founder and chief designer Horst Lettenmayer, as chairman of the board, is leading the company together with his successor, Ms Julia-Alina Lettenmayer, as a board member, into a new age of lighting. The early and forward-looking decision not to follow the universal trend, but rather individual demands for design and technology was the basis for the success that continues to this day. The wide variety of different designer lamps, each dominating in its respective technological content, was obvious right from the first very product following the company's foundation. The "Clarus" painting lamp was a revolution in lighting in a minimalist guise. It is already a cult product and has received the German Art Protection award (Deutscher Kunstschutz) as well as prestigious international design awards.

Further developments focused on lighting for living spaces, offices and bathrooms, as well as light to showcase architecture. This resulted in lamps to brighten all these areas with "Light for the future®". Our efforts to carry on producing lamps as individual hand-crafted pieces, to take the customer's personal wishes into account and to use carefully selected materials runs counter to the current trend of quantity before quality.

Julia-Alina und Horst Lettenmayer

Quality & Design

All of our lamp models' components are produced in our factory from brass using traditional armoury metalworking. This is done with meticulous craftsmanship, from the selection of the raw materials to their processing right down to the surface treatment. To top it off, each component then receives its own colour treatment. Galvanic processes are carried out in a plant for medical instruments, and all varnishes are hand-varnished and baked at 180° C. A timeless design should also be timeless in its durability.

01 Clarus

The latest advances in lighting technology right now are characterised by LED lamps. Our picture light is equipped with 3000 Kelvin as standard. The highly constant light output alongside low power consumption and an extremely long lifespan are ideal conditions for modern picture lighting. Application: lighting pictures, menus and music stands.

Material: brass, illuminant: single LED, LED efficiency class: A++, Ra: 90, ballast unit 20W:
107 x 41 x 22 mm, primary voltage: 220-240V, secondary voltage: DC 24V, rotatable fluorescent tube: Ø 14 mm, bracket tube: Ø 6 mm

Scope of delivery: whole lamp with illuminant, mounting set and a dimmable ballast unit.

04 Angulus

A novelty in our range of lamps is the "Angulus" picture light. The angular shape of the light fits in more harmoniously with corresponding picture frames. As with all our picture lamps, the lighting profile can be rotated in order to have the optimal light level set. This lamp has a duo LED illuminant, which allowed the light output to be doubled. Particularly suitable as display lighting. Application: lighting pictures, menus and music stands.

Material: brass, illuminant: dual LED, LED efficiency class: A++, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V, 12W ballast unit: 94 x 36 x 18 mm, 30W ballast unit: 133 x 46 x 24 mm rotatable fluorescent tube: 17 x 17 mm, bracket tube: Ø 8 mm

Scope of delivery: whole lamp with diffuser cover, mounting set and a dimmable ballast unit.

07 Minimus

As an extension to our "Clarus" lamp, but with a tube diameter of 18 mm, this lamp was developed for the use of a dual LED unit. The double brightness of the "Minimus" is a decisive factor for choosing this product. As a secondary effect, this painting lamp can also be used to brighten rooms. The output light mainly brightens the object in question, but the inevitable scattered light emitted from the lamp fills the room with a basic level of brightness that is an unperceived requirement for our well-being. Application: picture lighting, menu lighting and music stand lighting.

Material: brass, illuminant: dual LED, LED efficiency class: A++, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V, 12W ballast unit: 94 x 36 x 18 mm, 30W ballast unit: 133 x 46 x 24 mm, rotatable fluorescent tube: Ø 18 mm, bracket tube: Ø 8 mm

Scope of delivery: whole lamp with illuminant, mounting set and a dimmable ballast unit.

07 Minimus Mono

The LED picture light with a single central bracket is ideal for small pictures or photos. The light output is very high despite its short length. The lamp can either be attached to the back of the picture frame or to the wall. The level of light can be regulated by parallel rotation of the ends of the tubes.

Material: brass, illuminant: single LED, LED efficiency class: A++, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V, 12W ballast unit: 94 x 36 x 18 mm, light tube: Ø 18 mm, fluorescent tube: Ø 8 mm

Scope of delivery: whole lamp with LED illuminant, mounting set and a dimmable ballast unit.

17 Maximus

In order to illuminate large paintings with strong frames, a correspondingly larger picture light is required to optically balance the picture and the light. This is why the „Maximus“ picture light was created, which can be used for pictures up to several metres wide. Using this lamp as painting or museum lighting also has a secondary effect of brightening the room. The output light mainly brightens the object in question, but the inevitable scattered light emitted from the lamp fills the room with a basic level of brightness that is an unperceived requirement for our well-being. Application: picture lighting, shelf lighting and wall lighting.

Material: brass, illuminant: dual LED, LED efficiency class: A++, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V, rotatable fluorescent tube: Ø 34 mm, bracket tube: Ø 8 mm, ballast unit 12W: 94 x 36 x 18 mm, 30W ballast unit: 133 x 46 x 24 mm

Scope of delivery: whole lamp with illuminant, mounting set and a dimmable ballast unit.

03 Ductus

Desk or wall lamp with the highest level of precision craftsmanship. Holding brackets come in various shapes and lengths. Either as a plug-in version on lecterns, with mounting collars for installation on walls or for permanent installation on shelves using retaining clamps. Also ideal as a showcase lamp and display panel lighting due to its low current consumption and extremely long service life. Application: picture, menu and desk/lectern lighting.

Material: brass, illuminant: LED, LED efficiency class: A++, Ra: 90, primary voltage: 220-240V, secondary voltage: DC 24V, 20W ballast unit: 107 x 41 x 22 mm, rotatable fluorescent tube: Ø 14 mm, bracket tube: Ø 6 mm

Scope of delivery: whole lamp with LED illuminant, dimmable ballast unit and threaded sleeve with flange.

33 Piano

LED music stand lamp made of brass with black, flocked switchboard. Every pianist or organist needs good lighting to be able to read their music. This lamp solves the problem of attachment to valuable instruments. It is adjustable in height and attached to a velvet-covered board, which then becomes a music stand. The only wiring is a socket on the bass end of the keyboard. Simply unplug the transformer cable, and the board can be readily removed, together with the lamp, and the piano closed. The fluorescent tube can be rotated and the pianist can adjust the lighting him or herself. Application: music stand lighting, menu lighting.

Material: brass, illuminant: LED, LED efficiency class: A++, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V/12W, panel dimensions: 380 x 250 x 12 mm, total weight: 900 g, rotatable fluorescent tube: Ø 14 mm, bracket tube: Ø 6 mm, bracket width: 190 mm

Scope of delivery: whole lamp with LED illuminant, touch dimmer, plug-in power supply (4-metre long cable) and optional black panel.

27 Galerie 2

Connected load for high-voltage lamps 110 – 230 V as well as for low-voltage operation (LED). Installed as a basic fitting all around rooms in the wall-ceiling joint, paintings can be hung at all heights and distances. At the same time, the electricity for a painting lamp is also conducted.

The suspension pendants made of 6-mm round aluminium are available in different lengths. By simply turning them 90°, they are locked in the busbar slot and supplied with electricity. The load of each pendant is 5 kg. For higher loads, several pendants should be used where necessary. A height-adjustable picture hook is mounted at the lower end of each pendant. With this equipment, you can custom decorate and illuminate each vernissage. Ideal for walls with wood panelling or fabric covering.

Material: aluminium, colour: white RAL9016, light output: 110-230 V, Ampere: 10, rail dimensions: 36 x 12 mm, coupling piece dimensions: 40 x 25 mm, pendant head dimensions: 35 x 10 mm

05 Acus Office

A piece of minimised technology. Aesthetics in motion and workmanship. Clear relationships as to form and functionality. The lamp is attached to the table-top with an elaborately developed, patented clamping foot. The light stand can be raised or lowered as desired. The fluorescent tube's inclination is fully adjustable from a horizontal to a vertical position. In addition, the fluorescent tube, and therefore the light output can be rotated by 140°.

All electronic components as well as the switch are located as a ballast inside the thickened fluorescent tube. The wiring is 2.5 metres in length. Two rocker arms on the lamp make assembly tools unnecessary. The elegant, handmade lamp is destined to be a classic.

Material: brass, illuminant: dual LED, LED efficiency class: A++, Ra: 94+, Kelvin: 3100K, rotatable fluorescent tube: Ø 18 mm, lamp length: 1300 mm, height adjustability: up to max. 800 mm, plate thickness: up to max. 35 mm

Scope of delivery: whole lamp with illuminant and plug-in power supply.

11 Centre oú

Art needs to be positioned well in a room to be effective. At the same time, the art requires special lighting. The purpose of this source of light is to place the work of art centrally for the viewer. Art does not follow light, but rather light follows art. Sculptures or pictures shape the room with their structure, colour and relief. Their effect is emphasised with this light effigy – from a warmly dimmed glow to bright white floodlights. Harmony of art and light to perfection. The brightness can be adjusted via a dimmer control.

Material: brass, illuminant: dual LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 3100K, Ra: 94+, primary voltage: 220V - 240V, primary voltage: 220V - 240V, dimmable: via touch dimmer, rotatable fluorescent tube: Ø 18 mm, total height: 950 mm, base dimensions: 100 x 100 x 50 mm

Scope of delivery: whole lamp with illuminant and power supply.

26 Cappello

The LED era makes it possible to design unconventional lighting. With this lamp, the light is no longer centre stage, but the lampshade itself is the light. Power is supplied via a 2.5 m cable power pack and a miniature jack plug directly in the lampshade, and is switched on and off using a cable switch. If you wish to greet your host with the obligatory champagne bottle in your hand for your next invitation, simply put this lampshade over the bottleneck.

Material: brass, illuminant: LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 2700K, Ra: 94+, primary voltage: 100V - 240V

Scope of delivery: lampshade with LED illuminant and plug-in power supply with rocker switch.

10 Luxus

Bright, glare-free table lamp in an „Art Deco“ style as a high-quality, hand-made designer lamp. The lamp head can be rotated up to 360° and distributes the light on tables, walls or ceilings in a pleasant way. The „Luxus“ table lamp is equipped with 7 power LEDs and is technologically very modern with a retro look.

Material: brass, illuminant: dual LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 3000K, Ra: 90+, primary voltage: 220V - 240V, colour rendering index: 90, dimmable: via touch dimmer, base dimensions: 200 x 200 x 20 mm

Scope of delivery: whole lamp with illuminant, plug-in power supply and touch point.

25 Filum

Height-adjustable pendant lighting fixture with touch dimmer and switching technology. Fluorescent tube can be rotated 360° for targeted lighting. The switching and stepless dimming functions are executed by touching the pin in the fluorescent tube. The pendant lamp is suitable for all ceiling heights, since the cable lengths can be individually adjusted. The fluorescent tube is made of brass and then plated in shiny chrome. The geometric counterweight is made of black plastic.

Material: brass, illuminant: dual LED, LED lifespan: 50,000 hours, efficiency class: A++, light colour: 3000K, Ra: 90+, dimmable: touch dimmer, primary voltage: 220V - 240V, secondary voltage: DC 24V, ECG ceiling fixture: 75 x 70 mm, rotatable fluorescent tube: Ø 18 mm

Scope of delivery: complete luminaire with ceiling mount including electronic LED ballast unit in the ceiling fixture and touch dimmer on the fluorescent tube. Pendant cords as standard for a ceiling height of 3.10 metres.

28 Cubus

Stylish linear fluorescent LED lamp designed as a modern chandelier in aluminium. Dual strip lights with a 2400 or 3000 Kelvin light colour are located within the U-beams. This way, the core brightness is distributed over a large volume of space without glare. Its unobtrusive design provides harmonisation in both classic arcades as well as modern halls and archways. The light output is 88 watts and can be dimmed steplessly. The acrylic-covered strip lights make this lamp last up to 50,000 hours without maintenance. The length of the suspension pendant can be supplied as per the customer's wishes.

Material: aluminium, illuminant: dual LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 2700K, Ra: 94+, ceiling plate: 40 x 40 mm, suspension pendant: Ø 18 x 1200 mm, chandelier dimensions: 1200 x 400 mm, 100W ballast unit: 30 x 51 x 40 mm

Scope of delivery: whole lamp with built-in LED illuminant, plexiglass cover.

15 Shelf light

As part of the new development of LEDs for lamps and lighting systems, we have developed a shelf lamp with an integrated LED illuminant. Since LEDs offer only advantages when it comes to energy balance, safety requirements and temperature management, this lamp is compatible for use with tubular steel shelves such as USM Haller systems or others. System lengths of 350 mm and 625 mm on request.

Material: brass, illuminant: LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 3000K, Ra: 90+, primary voltage: 220V - 240V, secondary voltage: DC 24V, tube dimensions: Ø 19.3 mm

Scope of delivery: fluorescent tube, including LED illuminant, 2 x drilled connectors, 2 metres of wiring (other cable lengths possible on request), suitable ballast unit. Feed wire for assembly.

15 Vestiaire

The classic wardrobe rail has now turned into wardrobe lighting. High-quality brass tube with two decorative rings enclosed by a continuous LED light strip with a 3000 Kelvin light colour. This lighting makes the often tedious choice of what to wear easier. If the wardrobe doors are closed, the light will then automatically switch on when the doors are opened. On request, the lamp can also be delivered according to the dimensions you need.

Material: brass, illuminant: single LED, lifespan: 50,000 hours, efficiency class: A++, light colour: 3000K, Ra: 90+, primary voltage: 220V - 240V, secondary voltage: DC 24V, tube dimensions: Ø 34 mm

Extremely minimalistic and yet supremely functional. Assembled as one line of light, this lamp brightens entire rooms. Because the light shines both directly and indirectly into the room, there is no need for additional room lighting. The LED version can be rotated so that the brightness level between direct and indirect lighting can be changed. Application: bathrooms, dressing rooms in private areas, as well as in hotels.

Material: brass, illuminant: triple LED, lifespan: 50,000 hours, efficiency class: A++, primary voltage: 220V - 240V, secondary voltage: DC 24V, fluorescent tube: Ø 18 mm, glass tube: matted glass

06 Discus

High-quality crystal mirror with indirect circular illumination with 56 LED modules connected in series. This design has an extravagant feel. The LED ring light will envelop your face in a flattering but honest manner. A prominent shape highlights your prominent features. It is only natural then that this mirror does not tolerate anything in its reflection apart from what it is supposed to show. The light illuminates the person facing it either as a standing version or as a wall mirror. The lamp can be regulated steplessly with a dimmer switch and ballast unit. Application: as a make-up mirror in bathrooms, theatres or hotels.

Material: brass, illuminant: LED, lifespan: 50,000 hours, LED efficiency class: A++, primary voltage: 220 - 240V, mirror circumference: Ø 520 mm, height of the stand: 340 mm, total height: 860 mm

Scope of delivery: whole mirror with illuminant, touch dimmer and ballast unit.

Energy-saving LED technology with warm tones ensures pleasant and effective bathroom lighting. The lamp can be attached to any mirror with a max. thickness of 6 mm. Place the mirror lamp profile with the hollow edge on the mirror and tighten onto the mirror rear with the 6 mm screws. Also ideally suited as under-cabinet lighting or counter lighting. Application: bathrooms, dressing rooms in private areas, and in hotels.

Material: aluminium, illuminant: dual LED, lifespan: 50,000 hours, efficiency class: A ++, primary voltage: 220V - 240V, secondary voltage: DC 24V, profile dimensions: 25 x 18 mm, 30W ballast unit: 133 x 46 x 24 mm

Scope of delivery: whole lamp with dual LED lighting, diffuser cover and dimmable ballast unit.

22 Disque

Swimming pool flood light of high-quality workmanship with powerful LED light output. Energy-saving pool lighting. Installation height 16 mm on each swimming pool wall. Retrofitting is also possible and easy to carry out. Cooling is via colour convection. At 26° C, the LED lamp can be progressively dimmed (PWM ballast unit).

betec swimming pool flood lights can be retrofitted in existing swimming pools. Only 1/10 energy consumption. Very long service life. Minimal installation costs. Because the lamps generate less heat when used underwater, there is no algae growth on the surface. Flood light with complete V4A design. LSG safety glass and safety shutdown when cooling is interrupted (e.g., no water in the pool).

Material: stainless, polished, anti-algae V4A, diameter: Ø 185 mm, depth: 16 mm, illuminant: 6 x power LED, LED lifespan: 50,000 hours, LED efficiency class: A++, light colour: 3000 Kelvin, colour rendering index: 80, total: 2500 mA, light field: 700 x 850 mm, angle of light: 130°, range: 8m 50%

Scope of delivery: one flood light with encapsulated power LEDs and plug-in power supply. 5-metre cable.

16 Planus

A complete lighting system with integrated transformer for max. 2 m busbar, which is snapped into the aesthetically shaped cover housing with a clip. The position of the conductor in the housing is variable. Centralised or projecting left-right. The standard Lux 1 spot has a joint that can be tilted by 180°. Version 2 comes with our Lux 3 spot, whose light reaches all areas thanks to a double gimbal joint. Application: lighting system for low ceilings, small rooms such as children's rooms, corridors, cloakrooms, stairwells; can also be used as a decorative wall lamp in cinemas or on columns.

LED efficiency class: A++, illuminant: LED, socket: GX 5.3, 1-30W ballast unit: 133 x 46 x 24 mm, dimmability: limited

Scope of delivery: transformer, busbar with 2 retaining clamps for the rail, spots (Lux 1 or Lux 3) without illuminant. The transformer colour is the same as the rail colour.

19 Galaxy

As far as its conductivity and light output capability is concerned, our galaxy system is the smallest low-voltage busbar system on the market. The circular conductor with a diameter of 15 mm integrates two conductor profiles of nickel-plated or gold-plated colour with a single cross-section of 55 mm². This means you can have a long rail control system without a drop in voltage. Single rails can be mechanically and electrically connected using plug pins or coupling shells. The toroidal transformer with 300 VA integrated in the system acts as a voltage source (dimmability is limited). Two triangular plates are used to supply power to the rail and for optimal adjustment within the room.

Transformer: 300 VA toroid with thermal switch and miniature fuse, light output: max. 250 watts, LED efficiency class: C, illuminant: MR16, socket: GX5.3, 300W encapsulated transformer: 140 x 50 x 37 mm, dimmable: yes (electrically), limited suitability for LED lamps

Scope of delivery: transformer, busbar with 2 retaining clamps for the rail, spots (Lux 1 or Lux 3) without illuminant. The transformer colour is the same as the rail colour.

69 Galaxis & Planus

The advantage of the galaxy system is that users, architects, planners and project planners can custom-design their lighting concept. Our pin connectors are the latest form of our connection technology, which connects the busbars to one another both mechanically and electrically, but without any effect on the decor. This requires a pin hole in the aluminium conductor.

51 Umrüstung Clarus

The EU Lamp Regulation affects both the 100W-80W incandescent lamp and small lamps.
In this context, we would like to point out that we can no longer acquire the following festoons:
15V/5W, 18V/5W, 48V/5W

For reasons of increased light efficiency and a significantly increased lifespan of 50,000 hours, we will retrofit your picture lights that have festoon lamps using versions of the latest LED technology. Increased luminous efficacy with only 10% of the previous electricity consumption, without the lamp or the object heating up.

Illuminant: single LED, lifespan: 50,000 hours, LED efficiency class: A++, primary voltage: 220V-240V, secondary voltage: DC 24V, 20W ballast unit: 94 x 36 x 18 mm

For safety reasons, retrofittings may only be carried out by electrical industry specialists.
Therefore, you should send your lamp to us for retrofitting.

Special lamps

Project Phoenix Restaurant at the Dreischeibenhaus Düsseldorf

February 2016

Special lights made of stainless steel V2A with Halogène bulbs. Design and production of 30 hanging lights and table lamps with fabric-covered cables, designed by the company Kromayer. The perforated metal cylinders have been manufactured and enameled by a German contractor.

Project suburban railway station in Untermenzing

December 2005

Long distance light for indoor and outdoor area lighting with fluorescent tubes. The light housing is made of anodised aluminium. The position of reflectors makes it possible to reflect 100% of the light output of the tube onto a flat surface. At the same time, permanently mounted tubes serve as a handrail strip.

Special lamps

Project Borgeaud bibliotheques, Médiathèque l'Apostrophe Chartres

March 2007

This light meets high photometric and aesthetic demands for the areas of architecture, interior design and the treatment of furniture. The ideal bookshelf lighting.

Project Théâtre du Capitole Toulouse

February 2002

If large paintings with powerful images are illuminated, a great picture light is required for the optical balance between the image and the light. Our "Maximus" can be adapted to optimally illuminate images with widths of several meters.

Special lamps

Library Technical University Garching

December 2017

Customization of the desk lamps with movable arm and console, including USB plug, on/off switch and Socle. 7 Watt, 4000 Kelvin LED light. Surface paint colour DB702.

Archbishop's Ordinariate / Palais Holnstein

September 2017

Wall lamp in the courtyards of the Archbishop's ordinariate. Design: Walter Bamberger / Technical implementation: betec Licht AG

Special lamps

Chandelier LED

April 2017

This chandelier was produced for a construction project in Munich, according to the design of Mr. Gottfried Riesner. We are pleased to continue to include this pendant light in our standard range.

Project Phoenix Restaurant at the Dreischeibenhaus Düsseldorf

February 2016

Special lights made of stainless steel V2A with Halogen bulbs. Design and production of 6 floor lamps, designed by the company Kromayer.

betec® General standard terms and conditions

All lamps deviating from this product range are custom-made lamps and are offered with corresponding surcharges! Initial orders are executed only against prepayment. Subject to technical changes. This catalogue is protected.

Imprint: Board of Director: Horst Lettenmayer, Product photography: Eugen Haller, Sessner Dachau, Layout: Julia-Alina Lettenmayer, Text: Horst Lettenmayer

1. General: with the order confirmation the buyer accepts our delivery conditions to be legally binding unless deviations hereto we agreed to before in writing. They are applicable without any exception in those cases in which the buyer regards his conditions as the only decisive ones. Our silence in regard to the conditions of the purchaser can under no circumstances be regarded as acceptance of same. Any non-compliance with our conditions by the purchaser authorizes us to take the necessary legal steps. Every agreement with us or our representatives needs our written confirmation. The use of the Uniform Laws of 17. July 1973 on the International Purchase of movable items and the closing of International Purchase Orders is excluded.

2. Offers are subject to alteration without notice and are not binding in regard to delivery. We can neither be held responsible for malshipments due to misunderstanding in telexes, telephone, cable, fax or oral information nor from otherwise incomplete or unclear statements, documentation, drawings, samples etc.

3. Prices are ex works, excluding packaging, plus VAT. The agreed prices are based on the cost factor existing at the time of ordering. We retain the right to price corrections in case the cost factors change due to wage- and material price increases, additional working steps in special makes, etc.

4. The duty to deliver will not be cancelled through delayed partial shipments or constant objections, especially in case of custom-made items. Contract completed orders are subject to recall within the agreed period, at the latest after six months. Thereafter we are entitled to either deliver the remainder of the order or cancel the rest. a) A return of goods will only be credited in case of previous consent. The undamaged products in original packaging will be credited with 80% of the invoice price. Necessary extra work and packaging costs plus transportation charges will be subtracted without any prior notice. Custom-made products will not be reaccepted. b) The minimum order value for any shipment is € 50,- (without VAT). For deliveries below this amount a proportionate processing charge of € 10,- (excl. VAT) plus the packaging and shipment costs will be charged. c) Whenever planning or production of special equipment became necessary for the make of the cancelled goods, then those costs will also have to be reimbursed completely; furthermore expenses for any pre-material plus their respective stock and administration charges as far as not intended for any other purpose. Any failures resulting from force majeure or disturbances internally or at our suppliers' plus non-compliance with our payment conditions does not release us from our duty of delivery and justify no claims for compensation. Basically, we can only be bound to delivery if the credit-worthiness of the purchaser is beyond all doubt. A basic ruling of this company is that first orders are subject to C.O.D. deliveries. Our new customers therefore allow us with their first order to send an advance invoice at the latest when goods are ready for shipment which they may regulate with discount. After receipt of payment we will then immediately undertake the shipment. For slow customers the C.O.D.-delivery remains in effect.

5. The given delivery time is dependent upon the prerequisite of a smooth business course and an even production run together with the timely receipt of necessary raw materials. Our information is calculated from the date of confirmation, resp. clarification of all details and refer to the shipment date ex works. An extension of delivery time may be given, e.g. if the purchaser does not keep our business conditions. 6. Tolerances in regard to measurement and material are to be granted as is common also for those according to drawings. Claims exceeding these are subject to a respective surcharge.

7. Special makes, differing from the standard version can only be considered if included in the order or

furnished with an order no. If a special product - in spite of most careful planning and calculation - can not be made as laid down in the offer, the purchaser is not entitled to ask for damages. Any costs for the make of tools and samples are to be reimbursed in any case.

8. Packaging is invoiced at prime cost and due to lack of regulations is done in our judgment. The prompt acceptance of the goods through the Post Office, Railway etc. confirm the faultless packing of our goods.

9. Dispatch of goods takes place on account of the purchaser: The risks transferred to the purchaser the moment the goods leave the factory, disregarding whether free of charge, fob or CIF shipments were agreed. If no special transportation mode and no special way are specified, we select the transportation means ourselves. Foreign carriage cannot be compensated. We cannot be held liable for any delays or additional costs for the transportation. We are at all times entitled to shipment by C.O.D., ask for advance payment resp. insure the goods for a small fee.

10. Complaints in regard to number resp. quality of goods can only be considered, if they were handed in in writing within 7 days after receipt of goods. Evidently faulty goods that are still in the shipment state, will be replaced or reworked only irrespective the right to reduce the remuneration or cancel the order when failing the afterwork or replacement delivery, if goods are being returned to us within the permissible complaint period and amounts to more than 5% of the whole shipment. A return of shipped goods may only take place with our consent. All replaced goods will come into our ownership. Further claims, espec. damages, reimbursement of wages and materials are excluded. Our liability for all faults will expire if the purchaser of our products mixes them with items of different origin, reworks himself faulty products or does not meet this contractual obligations. Lamps are technical working means according to the product safety law and may only be used for their intended purposes. Any use of lamps and supplementary parts contrary to their purpose as well as unauthorized changes on our lamps without our prior written consent releases us from all liabilities in case of damage. For losses and damages during transportation the recipient must have those immediately certified with the train- or post office authorities and file claims for compensation there.

11. Reservation of Title. We retain the right of ownership of the delivered goods, even if subsequently treated, until the fulfillment of all claims from this contract. Even if our goods will be connected with other items, the purchaser may only sell the goods under reserved title. Claims from a resale of the reserved goods are to be ceded irrevocably to us in the amount of our claims including interest and costs. In case of possible inability of payment, composition settlement or even pledging resp. bankruptcy of the purchaser, same is bound to return the reserved goods unasked and free of charge. Pawning, protective conveyance or a sale of the reserved goods is excluded. We retain the right to reclaim the reserved goods until their full payment. The enforcement of § 28 VO is excluded.

12. Our invoices are payable within 14 days from invoice date with 2% discount on the net product value or within 30 days net to one of the accounts mentioned on the next page or by cheque to our address. With C.O.D. shipments and immediate advance payment we grant 2% discount on the net product value. We will not accept bills of exchange. Only after their discharge will cheques be regarded as payment. Bank discounts or other expenses are to be charged to the customer. Deductions for transportation or packing costs are inadmissible. Payments because of complaints may under no circumstance be delayed. In case a purchaser does not meet his liabilities, we are entitled to stop further shipments until complete payment. Whenever the deadline for outstanding payments is exceeded, the purchaser - without being specially informed by us - will be levied with an interest that is common for unpaid credits with banks. Extension of time, counterclaims or retention of partial payments, no matter what the reason may be, are excluded without our prior written consent. All expenses arising from a reminder, delayed payment, confiscation or non-acceptance of ordered goods must be borne by the purchaser. Any telephone/cable charges, etc. by the purchaser are also excluded.

13. The guarantee for our products amounts to 24 months. Longer-lasting guarantees must be agreed separately. The guarantee does not refer to bulbs and transformers.

14. Place of performance for shipments and payments is Munich exclusively. The law of Germany applies to our delivery conditions and all legal connections between the purchaser and us.

15. Special regulations or any possible legal ineffectiveness of individual points of these delivery conditions do not infringe the validity of the others.
