Instructions for Assembly:

- Ensure that you have received all the parts required (see check list) and that they are undamaged. Should you have any cause for complaint, please contact your KETTLER® Dealer.
- Before assembling the equipment, study the drawings carefully and carry out the operations in the order shown by the diagram. The correct sequence is given in capital letters.
- The fastening material required for each assembly step is shown in the diagram inset. Use the fastening material exactly as instructed.
- The equipment must be assembled with due care by an adult person. If in doubt call upon the help of a second person, if possible technically talented.
- Please note that there is **always** a danger of injury when working with tools or doing manual work. Therefore please be careful when assembling this apparatus.

- Ensure that your working area is free of possible sources of danger, for example don't leave tools lying around. Always dispose packaging material in such a way that it may not cause any danger. There is always a **risk of suffocation** if children play with plastic bags!
- Bolt all the parts together loosely at first, and check that they have been assembled correctly. Tighten the lock nuts by hand until resistance is felt, then **use spanner to tighten nuts completely against resistance (locking device)**. Then check that all screw connections have been tightened firmly. **Attention:** once locknuts have been unscrewed they no longer function correctly (the locking device is destroyed), and must be replaced.
- For technical reasons, we reserve the right to carry out preliminary assembly work (e.g. addition of tubing plugs).
- **Waste Disposal:** KETTLER® products are recyclable. At the end of its useful life please dispose of this apparatus correctly and safely (local refuse sites).
