The eight largest U.S. financial companies (JP Morgan, Wells Fargo, Bank of America, Citigroup, Goldman Sachs, U.S. Bancorp, Bank of New York Mellon and Morgan Stanley) are 100% controlled by ten shareholders and we have four companies always present in all decisions: BlackRock, State Street, Vanguard and Fidelity. In addition, the Federal Reserve is comprised of 12 banks, represented by a board of seven people, which comprises representatives of the "big four," which in turn are present in all other entities. In short, the US Federal Reserve is controlled by four large private companies: BlackRock, State Street, Vanguard and Fidelity.

The monetary gold reserves of the following central banks are owned and held by the Global Debt Facility. These private banks are insolvent; most of their outstanding debt is held by the Global Debt Facility.

Although I was not permitted to enter the Spring Meetings today, I was able to confer on the seventh discussion point in the Letter of Intent dated November 8, 2014: <https://s3.amazonaws.com/khudes/Letter+of+Intent.pdf> with the Group of 77 and with several other countries. Between 1928 -1932 there were five years of Geneva conventions. In 1930 the U.S., Great Britain, France, Germany, Italy, Spain, Portugal all declared bankruptcy. It is not necessary for the Global Currency Reset to be preceded by treaties. Instead, the following Central Banks will be resolved by placing these banks under receivership in the Global Debt Facility. The activities of these central banks will be resumed by the countries in which they are located when the fractional reserve fiat currencies have been replaced by national currencies minted from the gold in the Global Debt Facility:

Central Bank of Argentina
