The "global currency reset" is exchanging the paper currency of each country for its currency minted from the gold in the Global Debt Facility. This will be in the form of aurum. <http://www.peakprosperity.com/podcast/84359/new-way-hold-gold>

People will be able to use whatever "money" they want to, including local currencies issued by towns and villages, to buy local goods and services. Silvio Gesell has a good idea about how to do this:

Countries will have a right to issue money backed by other commodities as well.

The company that thinks it has a right to issue our money for free, and to charge usury on our money, is in receivership in the Global Debt Facility. Three mathematicians at ETH Zurich call this company the super-entity.¹ The 60 private central banks owned by the company will be under the control of the countries they are in after they are reorganized in the Global Debt Facility.

The eight largest U.S. financial companies (JP Morgan, Wells Fargo, Bank of America, Citigroup, Goldman Sachs, U.S. Bancorp, Bank of New York Mellon and Morgan Stanley) are 100% controlled by ten shareholders and we have four companies always present in all decisions: BlackRock, State Street, Vanguard and Fidelity. In addition, the Federal Reserve is comprised of 12 banks, represented by a board of seven people, which comprises representatives of the "big four," which in turn are present in all other entities. In short, the US Federal Reserve is controlled by four large private companies: BlackRock, State Street, Vanguard and Fidelity.
