Lg android 10 update list

LG doesn't have the best track record for updating its smartphones to newer Android versions and that doesn't seem to be changing anytime soon. While other smartphone makers have rolled out Android 10 update for some of their phones, LG has just revealed the detailed time frame of the Android 10 rollout for its smartphones. That said, LG already has the Android 10 update for its G8 ThinQ smartphone in some markets. According to an official note shared by LG Italy, the South Korean tech giant will release Android 10 update for LG V40 ThinQ, LG V50 ThinQ, LG G8X ThinQ, LG G8s ThinQ, LG G7 ThinQ, LG K50S, LG K40S, LG Q60, and LG K50. The company noted that the upcoming Android 10 update for these phones will include LG UX 9.0 which is already available on the company's LG G8X smartphone. LG Italy revealed that LG V50 ThinQ will be the first of the mentioned smartphones to get Android 10 update in early February, followed by LG G8X ThinQ in Q2. LG G7 ThinQ, LG G8s ThinQ and LG V40 ThinQ get android 10 update in Q3, while the update in Q4 this year will come on LG K50S, LG K40S, LG K50 and LG Q60. In particular, this time frame comes from the company's Italy unit, so it may or may not be valid worldwide, but it still gives an idea of when we can expect these updates. To remember, the final version of Android 10 was released last September and comes with a number of new features including dark theme, enhanced privacy controls, focus mode, enhanced notifications, smart response, gesture navigation, and more. In addition to these features, LG will also include its own tweaks and features. For the latest tech news and reviews, follow Gadgets 360 on Twitter, Facebook and Google News. Read more: LG, Android 10, LG V50 ThinQ, LG V40 ThinQ, LG G7 ThinQ, LG G8X ThinQ, LG G8s ThinQ, LG K50S, LG K40S, LG Q60, LG K50 Below this story new updates are added..... Original story (published October 9, 2020) follows: Google released Android 11 last month and several OEMs have released the latest OS update for their devices as beta and stable versions, but LG is not among them. LG has been a little slow with software updates as the OEM is still providing the year-old Android 10 update for its devices. To remember, LG shared a software update schedule for LG G8s ThinQ, LG V40 ThinQ, and LG G7 ThinQ back in September. Now, another software update schedule along with the list of devices has been shared by LG for the fourth quarter of 2020. This time, the update schedule includes a number of devices, including LG V50S, LG Q70 and LG X6 (2019) that get performance updates. Source Also, the OEM shared of the Security Patch of September and a list of eligible devices that will receive a lot of new features. The devices include Wing, LG Velvet, LG V50S ThinQ, LG X4 (2019), LG V50 ThinQ, LG G8 ThinQ, LG Q9, LG V40 ThinQ, LG Q8 (2018), LG Q61 and LG G7 ThinQ. These devices are scheduled to get new updates along with new features in the near future, although some may be receiving the updates already. (Source 1, 2) LG has released the Android 10 update for most of its devices, but the OEM has been very slow with the OS update. It should be noted that the LG G8s ThinQ Android 10 update would be rolled out from October 8 in India, but there is still no sign of the OS update. Today, LG started rolling out the Android 10 update to LG G8X ThinQ units in South Africa months after other regional variants of the device had received the same. LG G8S ThinQ Hopefully LG aims to deliver faster updates to its eligible devices, as many OEMs are way ahead in the game. That said, you look at our LG Android 10 update tracker to get the latest updates on the topic. Update 1 (November 3) IST 10:55 a.m.: LG Korea has now shared the changelogs for devices that will get new software updates in November.
