Thought No. 1 You can do anything, but not everything. David Allen

The average lifespan of a human being is around 60 to 70 years old. If you are fortunate enough to live longer in this world, what would you like to accomplish?

We cannot do everything but you can do anything. It does only mean that we have to choose. We have to focus on what we really want. If you are not doing what you want, then stop it.

What do you really want to focus on? Have your goal and get it. You have your full potential of getting anything you want. Be realistic and have time to a certain goal. You will achieve happiness if you are highly contented with what you are doing.

Thought No. 2 You must be the change you wish to see in the world.
Mahatma Gandhi

Nobody can change the past. Our full capacity as an individual is to change our future. The future depends on what we do in the present. The future belongs to those who believe they can do something for themselves. The world is constantly changing, if you can't adapt to these changes, you might end up being obsolete.

Change is the only constant thing in this world. We cannot change the world directly. If we want to do so, we have to start it within ourselves.

Do not try to change others, change for yourself and try to influence them by being a good example to the society you are interacting with

This book is for you. It is fun and easy to read. You just need to spend one minute to every thought provided. This book will reveal you many secrets in life. The maximum result will be expected from your minimum time given. Each chapter is so short yet so powerful that can really open your mind to new ideas and realization.

We all want a better life, we can unleash our full potentials if we can start using our own minds in a right way. Success, goals, and dreams start inside of us. It is within ourselves, we have to first create them mentally before we can manifest their physical matter. Thoughts can surely become things if you just follow the 2-step creation process which is mental and physical creation.
