This book constitutes the thoroughly refereed post-workshop proceedings of the 5th International Workshop on Declarative Agent Languages and Technologies, DALT 2007, held in Honolulu, USA, in 2007.

It was an associated event of AAMAS 2007, the international conference on autonomous agents and multi-agent systems.

The 11 full papers, together with 1 keynote lecture and 2 invited papers from the AAMAS main conference were substantially enhanced after the workshop and carefully selected for inclusion in this publication.

The papers combine declarative and formal approaches with engineering and technology aspects of agents and multiagent systems.

They focus especially on modeling, goals, foundational concepts, and communication.
