**International Industrial Networks and Industrial Restructuring in Central and Eastern Europe** analyses the role of international industrial networks in industrial restructuring and corporate growth in central Europe, Russia and Ukraine. It shows that two distinct patterns of international industrial integration - domestic vs. foreign led modernisations - have developed in these two regions which have significant effects on patterns of growth and integration of these economies. **International Industrial Networks and Industrial Restructuring in Central and Eastern Europe** is based on a number of industry and firm case studies which are analysed and interpreted within the current international business and political economy literature.

The publication provides valuable insights to managers and policy-makers who are interested in understanding different strategic options for business activity in Central and East European countries. For the academic reader, it offers a new perspective on international, industrial networks in which theories on strategic management and on industry restructuring and corporate growth are merged into a new view of growth and transformation process.
