INTRODUCTION2

Welcome to the Monte Albán Onsite Guide app for your tablet!

You are going to have one of Mexico's most exciting experiences. Walking beside the ball court or through the Central Plaza, you can almost feel the ancient civilization that once built and occupied this city. You can imagine the colors and sounds of this sophisticated culture that flourished before Columbus or Cortez set foot on this continent. **Looking down to the Central Plaza from the Southern Platform**

Imagine, explore and have fun.

The Monte Albán Onsite Guide is meant for people who want to experience more information about this magnificent city. We wrote it for people who want more substance instead of aimlessly walking from building to building and temple to temple.

We built this guide to help you plan, prepare and experience one of Mexico's most fascinating ancient ruins: Monte Albán.

Even if you could get internet with your tablet at the site, it will be too slow and cumbersome to work efficiently. Some of the information is scattered on the web while other sources are still in journal and book form. This App combines the best information and allows you to download it and later access it onsite when you need it. **Monte Albán's Famous "Dancer" Stelae**

There are chapters that give advice before you go. Read through them and determine what works for you and the people you will be traveling with. Then take your tablet with you and read about Monte Albán's important structures and pyramids as you walk the site. And you can access the information quickly and efficiently on your tablet.

Please write and tell us how much you enjoyed your visit. We invite recommendations, comments and new information!

PLANNING YOUR VISIT3

A visit to Monte Albán will likely take 2 to 4 hours or more of

a moderately challenging walk. The Main Plaza is 300

meters (984 feet) long and you will likely walk it 2 to 4 times

to see all the buildings a 600 to 1200 meter (1969 to 3937

feet) walk. Additionally climbing both North and South

Platform and touring these and the grounds take additional

energy and stamina! The site is 1,940 m (6,400 ft.) above sea level so unless you are used to such heights, be prepared to take small breaks
