The Cognitive Abilities Test® (CogAT®) has been used for many years by school districts across the country that are evaluating their students for gifted and talented programs. In 2011, Riverside Publishing Company came out with a new Form 7 version of this test. Since most schools are using Form 7, this is the version we are going to talk about today. However, if you know your school will be administering CogAT® Form 6, we do have practice questions for both Forms 6 and 7 on [TestingMom.com®](#).

What is the Cognitive Abilities Test® (CogAT®)? The CogAT® is a cognitive test used by many school districts to qualify children for their gifted and talented programs. It is not an achievement test or an intelligence test. Cognitive Abilities Test® (CogAT®) is a registered trademark of Riverside Publishing, a Houghton Mifflin Company, or their affiliate(s), or their licensors. TestingMom.com® is not affiliated with nor related to Houghton Mifflin Company or its affiliates (“Houghton Mifflin”). Houghton Mifflin does not sponsor or endorse any TestingMom.com® product, nor have TestingMom.com® products or services been reviewed, certified, or approved by Houghton Mifflin. Trademarks referring to specific test providers are used by TestingMom.com® for nominative purposes only and such trademarks are solely the property of their respective owners. The test assesses reasoning and problem solving abilities in the areas of: 1) verbal, 2) quantitative (math) and 3) nonverbal arenas. Verbal items on the CogAT® are questions involving language, words, and life-like images. Quantitative questions assess mathematical reasoning skills. Nonverbal questions are shape-based problems. Nonverbal questions use geometric figures and children must identify relationships, similarities, and differences between shapes and patterns. They will also need to recognize visual sequences, visual analogies, and they will need to predict what a piece of paper might look like when folded, hole-punched, and then unfolded. The CogAT® is frequently given to qualify students for gifted and talented programs. The test may be given individually or in a group and will be administered by a test proctor or by a teacher. These tests are cost-effective for large school districts to use when they are assessing thousands of children. Sometimes children need to earn a certain score (or higher) on these tests to be automatically admitted to the district’s program. Other times, a qualifying score on one of these tests will identify students who will go on to take another test before they will be admitted to the gifted program.

WHAT LEVEL OF THE CogAT® WILL MY CHILD TAKE? CogAT® levels correspond with the age of the child. A child who is 5 or 6 will take the CogAT® Level 5/6. A 10-year-old will take Level 10, and so on. Questions for Levels 5/6 – 8 are picture based. Questions for Levels 9 – 17/18 are text based. Each subtest has 2 sample items and 14 – 24 questions, depending on the subtest and the age of the child. To see how many of each type of question is given at each level, visit <http://www.hmhco.com/hmh-assessments/ability/cogat-7>. In 2nd grade, your child may be given the CogAT® Primary Battery, a picture-based Battery of questions (similar to Levels 5/6-8) or she may be given the Multi-Level Battery, a text-based Battery of questions (similar to Levels 9-17/18). If your school doesn't tell you which Battery your 2nd grader will receive, practice both. They are similar questions that are presented in different ways. This is only an issue in 2nd grade. Let's take a look at the different types of questions that are on the CogAT® for both younger and older students. The answers are at the end. **VERBAL BATTERY (Levels 5/6 – 8)** **Verbal Analogies Parent:** Say to your child: "Look at the 2 pictures on top. They go together in some way. Look at the picture in the bottom box and then look at the 4 answer choices. Choose the answer that goes with the picture on the bottom the same way the pictures on top go together." 1.

If you are reading this, then you are a parent or a grandparent in Chicago who is thinking about finding the best possible school for your little one. There are so many options in Chicago that it can sometimes feel overwhelming, especially if your child is just 4-years-old! Even if your child is older, it's still a complicated process to understand.

Maybe you are fortunate to live in an area where your designated neighborhood school is great. Perhaps you are thinking of sending your child to one of Chicago's prestigious private elementary schools or you want to consider the options offered through the Chicago Public Schools (CPS). The Chicago Public School system is one of the largest school districts in the United States and there are many elementary school options to consider. In addition to general education programs, CPS offers magnet and magnet cluster schools (special emphasis on a topic area such as Fine Arts or Math & Science), along with charter (privately run), and Regional Gifted Centers and Classical Schools (academically advanced).

At www.TestingMom.com, we can advise you about the many school choices available in Chicago and provide you with resources to help you prepare for various admissions tests. In this ebook, we will focus on the Selective Enrollment Elementary Schools (SEES) of the Chicago Public Schools (CPS); specifically, the Regional Gifted Centers (RGCs) and Classical Schools, which you should consider if you are seeking a 'free' academically advanced curriculum for your gifted child. We will provide you with a general overview of the RGCs and Classical Schools as well as the application and testing process. In this ebook, you will also find some sample test prep practice questions from our website, as well as resources on recommended Chicago-based companies that can further assist you with navigating the SEES admissions process, assessing your child's critical thinking skills, or finding a tutor to help your little one prepare for his or her first gifted admissions test.
