Chapter 1: Introduction

Hi! My name is Iona and I am a self-love and dating coach that helps single women find a soul satisfying, passionate and long-term relationship.

I help them find the real deal.

Many of my clients come to me unsure of how to communicate with men, especially through text. This book is dedicated to them.

How much time have you spent analysing texts from men? Even if it's just a simple "Can't wait to see you xx". Those xx's at the end of a text can send someone wondering where the relationship is headed.

In an age where one word or x can change the tone and the entire meaning of your message, texting is a little like stepping into a dating minefield. - one message sent can determine the course of your relationship.

More often than not, dating starts with flirtatious texts and witty banter. If you struggle with knowing what to text to create connection with men or if you're wondering why he isn't texting you, you've come to the right place.

I have to preface this book but noting that texting is only one part of flirting and dating. The best relationships come from a place of self love and understanding of the other sex. If you want to explore this further, I recommend downloading a few of my freebies.

If there is one thing I know for sure, it's that we are all capable and deserving of the love we crave. Sometimes it just takes the simple act of realising that to open your heart. I hope these tips will help you find the love you're looking for.

Thanks again for downloading this book, I hope you enjoy it!

Chapter 2: The mindset you need before you send that text

There was a time where I'd panic every time a guy I really liked texted me. Frozen by fear of looking stupid or screwing up (again), I'd stew over what to text back. I'd google, ask girlfriends for advice and spent hours writing and re-writing my reply. I was a total stress case. If a guy texted me, I'd freak out. If he didn't text me, I'd also freak out. There was no winning.

If you've read any of my other stuff, you will know - our thoughts are powerful. My fear based thoughts - thoughts about whether I would meet someone special affected my ability to connect with men - even if it was just over text.

It wasn't that I didn't know how to text...it was that I was so afraid I'd never meet anyone, I would try so hard with the men I met, even if they were quite right for me. My fears were influencing the way I communicated online AND offline.

What I'm getting to is this - I can teach you everything I know about texting to help you communicate with men but if you don't go into dating with the right mindset - no amount of scripts and tricks will help you find the relationship you desire.

The key to finding your ideal relationship is so much more than texting. Texting is one small part in finding and creating a relationship.

Many women I work with often tell me they have trouble communicating with men but when we dig deeper, it's actually their mindset and lack of confidence that's blocking them. It's also their perception of what a relationship should be and the kind of relationship they think they deserve.

So what I'm about to share with you will show you how to communicate with men via text but if you're looking to attract the ideal relationship, there are other pieces you'll need to learn - especially mindset.

Throughout this book, we'll go through different scenarios that are tricky to work through over text but my general rule of thumb is, when in doubt - check into your mindset and emotions. Are you sending that text when you're angry or annoyed? Because those feelings will show up in your text and interactions, regardless of how much you try to suppress them.

Chapter 3: Texting etiquette and the texts you need to stop sending

Before we go into actual scenarios, I'm going to go over some basic texting etiquette, common courtesies most people forget.

Time your texts

Unless it's an emergency or a booty call (which is not something you do if you want a committed relationship), you should avoid sending texts late night. There are several reasons for this:

He's probably sleeping. Not everyone sleeps with the ring/text tone off. Don't be the one to ruin a good night's sleep.

It gives off an impression that you might be up for something more.

It leaves a little mystery, especially in the early stages of your relationship.

People who have bought this say:

"The guide to texting men really changed my perception about texting guys. I would normally just speak my mind without thinking about how they would receive the message and how it would make them feel. I now know from reading the book that that's where I was going wrong. I applied this to a real-life scenario recently when a guy texted me and cancelled on me last minute. At first I was annoyed and I wanted him to know I was disappointed but I remembered from reading the book that it is not WHAT you say but HOW you say it. So, I simply shifted the tone and language of the message to be understanding and empathetic but subtly letting him know I was disappointed. He responded really well and we organised another night! I feel so much more confident texting men now. Safe to say it's my texting bible!" - Brianna

"This book offers so many interesting real-life examples and actionable tips on how to nail the texting game. It's an awesome read regardless of whether you're single or in a relationship." - Jen
