This volume explores the current issues and recent international developments in reservoir planning and operation, design and construction, monitoring and maintenance. In the light of the recent climatic changes which have seen a reduction in rainfall and resulted in water shortages, a number of pertinent subjects are examined in detail, for example the provision of new resources, evaluation of optimal operating policies, review of water supply options, sedimentation effects, the environmental aspects and the economic viability of reservoirs

Ecological Impacts of Fish Introductions - Ministère des Forêts - drought forecasting, climate change impact assessments, reservoir The emphasis in this book is on hydrometeorological forecasting.. longer-term planning for water resources, irrigation and flood risk... Proceedings of the seventh conference of the British Dam Society, Stirling, 24-27 June 1992. Browse by Format Type - USQ ePrints - The sixth and final joint meeting of TC 224-AAM was held on.
