KINZE ELECTRONICS

ELECTRONICS DESIGNED BY KINZE FOR KINZE

PUTTING MORE CONTROL IN YOUR HANDS

Precision is personal to us because every acre is personal to you. As farmers ourselves, we know that the more information you have at your fingertips, the better decisions you can make, increasing your profitability.

Kinze Electronics is a cutting-edge research and development group that turns ground breaking ideas into reality.

Our dedicated team of hardware, software, user interface and electrical engineers work tirelessly to make your planter work smarter.

Unparalleled performance in your field. All within your control.

INTRODUCING BLUE VANTAGE™ AND BLUE DRIVE™

The first two products brought to you by Kinze Electronics:

1. **Blue Vantage™**
the most user-friendly planter display on the market
2. **Blue Drive™**
electric drive system exclusively designed by Kinze

BLUE VANTAGE™ DISPLAY AND BLUE DRIVE™ AVAILABILITY

Model	Row Configuration	Down Force Option
3660	31 Row 15"	True Depth™, Pneumatic
4900	24 Row 30"	True Depth™, Pneumatic

BLUE VANTAGE™

THREE CLICKS TO PLANT

Throughout the development and testing process, we collaborated with many farmers to create the most user-friendly display on the market. When it's time to plant, you want to start quickly. With the Blue Vantage™ display, simply confirm settings on three screens and you are ready to plant.

Key Features

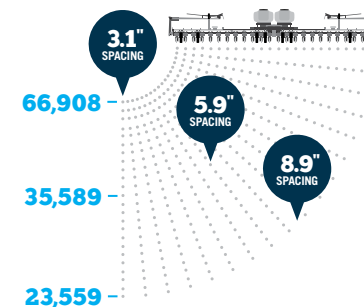

- 1. Intuitive and Easy to Use**
power it up and use it right away
- 2. Most Comprehensive Diagnostics Screen**
available on the market, providing detailed information on all system components when you need it
- 3. Optimized Plant Screen Layout**
provides all critical planting parameters and controls
- 4. High-Speed Ethernet Communication**
fast, reliable communication
- 5. Rugged 12" Touchscreen Display with Corning Gorilla® Glass**
high definition screen (1920 x 1080) with direct view outdoor-readable display
- 6. Quick Disconnect Tablet Dock & USB Ports**
for easy removal and data transfer
- 7. Row-by-Row Mapping**
see real-time performance by row while planting
- 8. Touch Pinch and Zoom**
easily adjust screen for optimal viewing

BLUE DRIVE™

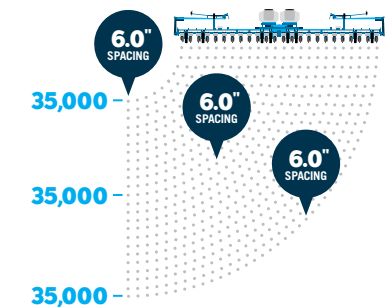

PLANT EXACTLY WHERE YOU NEED TO

Yield and profitability are directly related to how well the seed gets into the ground. The new Blue Drive™ electric drive system is designed to seamlessly integrate with the Blue Vantage™ display to analyze critical planting data and deliver seed exactly where it needs to be.

Without Curve Compensation¹

With Curve Compensation¹

Key Features

- 1. Designed by Kinze for Kinze**
one manufacturer for all components and software updates
- 2. System Architecture**
allows for instant troubleshooting and service
- 3. Curve Compensation**
corrects population and provides consistent seed spacing
- 4. Individual Row Modules**
to monitor and control each row unit
- 5. Few Moving Parts**
no chains, drive shafts, clutches or gearboxes
- 6. Weather and Water Resistant**
to withstand the elements
- 7. Section Control**
enhanced split row and set-back row shut-off performance

¹Based on 35,000-population rate, 24 row 30 inch planter, 60-foot radius turn, with sub-4 level GPS accuracy, actual spacing may vary based on individual field conditions.

KINZE MANUFACTURING, INC.

PLANTING, HARVESTING & TILLAGE SOLUTIONS BY FARMERS FOR FARMERS

From a shop in Ladora, Iowa, to today's sophisticated 160-acre campus and office complex with manufacturing and logistical support — Kinze has focused on one primary goal: designing and building solutions for farmers. That means listening to people who actually own and operate the equipment. Not only our loyal, hard-working customers, but many of our dedicated employees and the owners of Kinze Manufacturing who also farm.

DRIVEN BY CORE VALUES

Integrity | Customer Focus | Excellence | Innovation | Mutual Respect
