

## EBSA - Additional figures

### Central Indian Ocean Basin

Species	Location	Device	No. birds tracked	Start date	End date
Barau's petrel	Reunion Island	GLS	23	08/02/2008	16/09/2009
Red-tailed tropicbird	Madagascar	GLS	19	08/07/2010	12/07/2011
White-tailed tropicbird	Cousin Island	GLS	14	20/09/2009	14/01/2011
Wedge-tailed shearwater	Cousin Island	GLS	10	20/09/2009	14/01/2011

Table 1: Summary of some of the seabird species and populations that have been tracked and shown to be occurring in this area. Adapted from Le Corre *et al.* (2012).

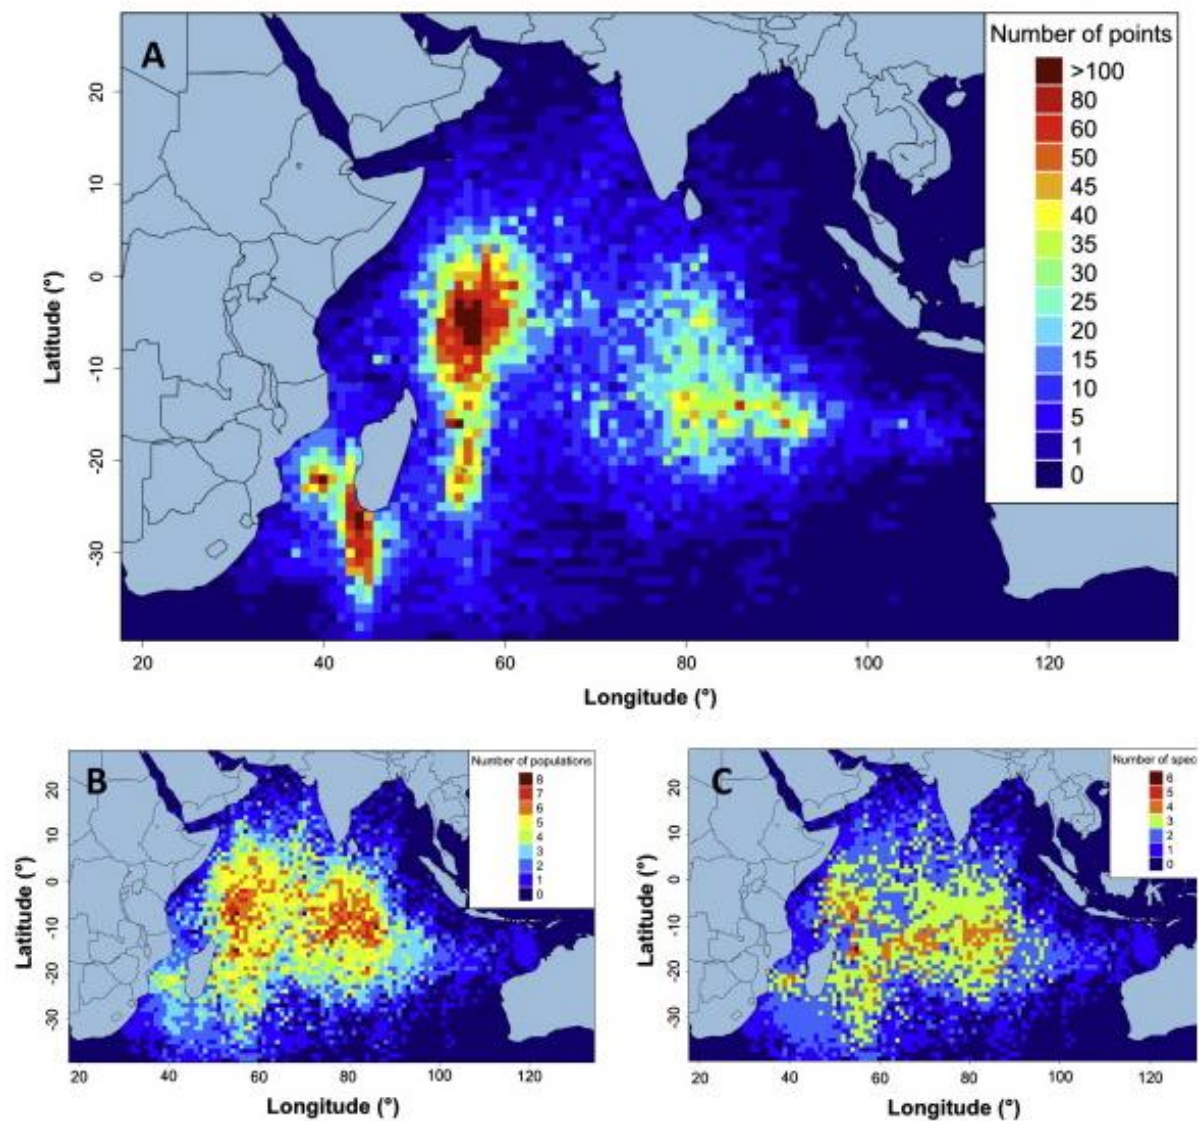

Figure 1. Seabird hotspots of the western Indian Ocean based on tracking data (A) seabird density, (B) population density and (C) species richness. From Le Corre *et al.* (2012).

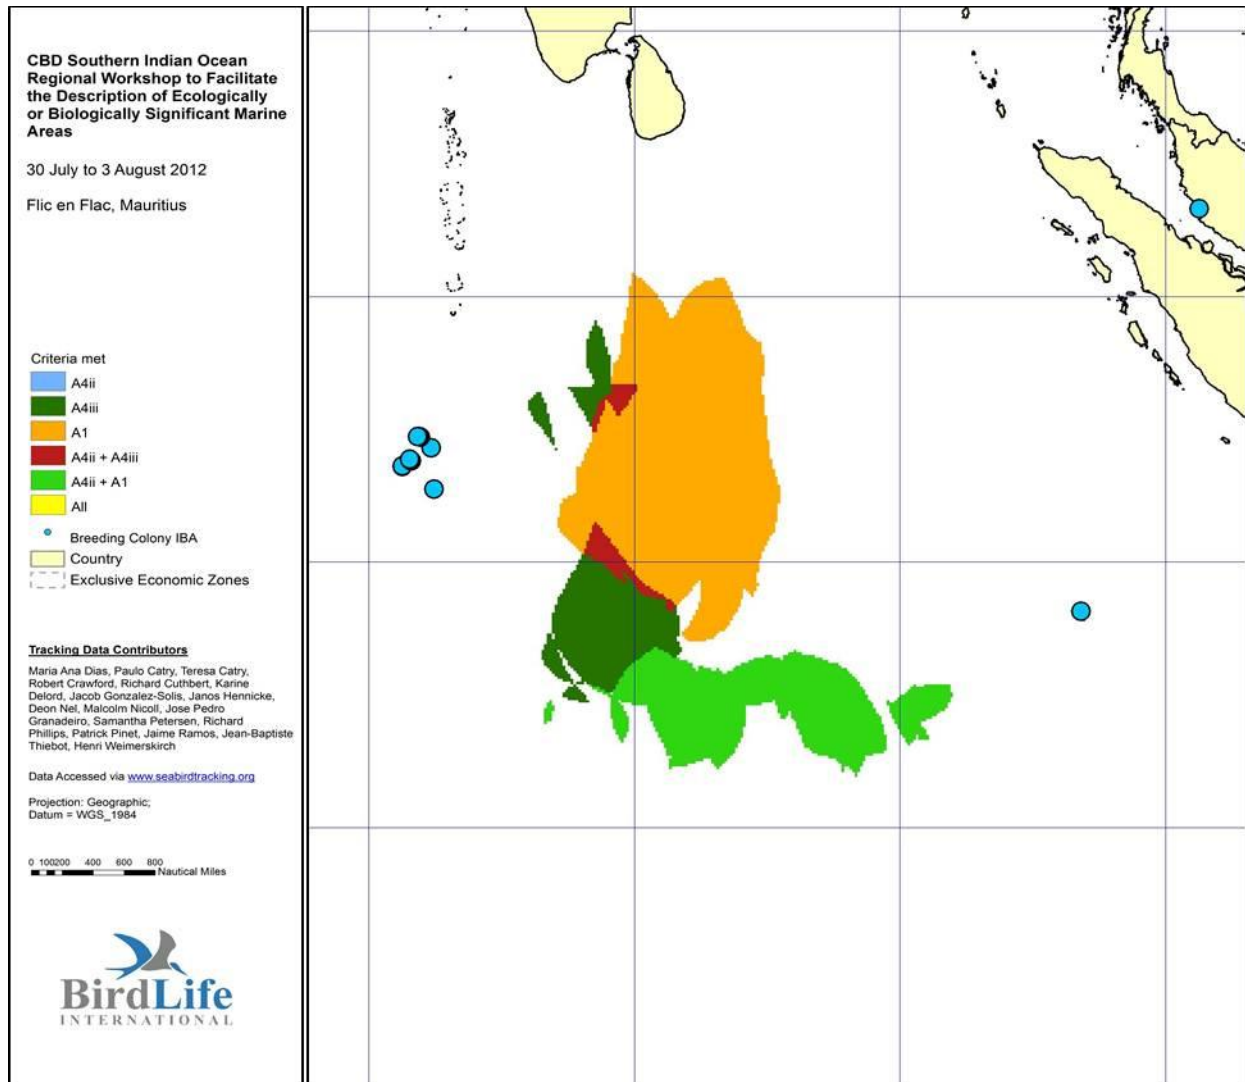

Figure 2: Map of areas meeting Important Bird Area criteria within the central Indian Ocean. Orange areas are for threatened species, dark green areas represent areas used by >20,000 individuals, light green areas are used by >1% of the global population of a species.

## Rights and permissions

Tracking data used in this analysis is property of the data owners, images provided here can be used with appropriate credits. Any request to publish these images elsewhere or to use the original tracking data will require permission; requests should be made to BirdLife International ([science@birdlife.org](mailto:science@birdlife.org))

The data used to define this area are part of a regional tracking program leaded by M. Le Corre and funded by the Pew Environmental Group aiming at identifying important marine areas in the tropical Indian Ocean.
