THE COALITION FOR CONSERVATION GENETICS

29th June 2026

Secretariat of the Convention on Biological Diversity,

Re: Endorsement of Comments from the Coalition for Conservation Genetics on the Global Review of Collective Progress in the Implementation of the Kunming-Montreal Global Biodiversity Framework

Hereby I confirm that I endorse the Coalition for Conservation Genetics (CCG) comments on the Global Review of Collective Progress in the Implementation of the Kunming-Montreal Global Biodiversity Framework.

Our comments focus on Target 4 and the A4 indicator, providing technical insights and recommendations that we hope will strengthen the global review process and contribute to more effective implementation pathways for the Framework.

The CCG recognizes the significance of this global review mechanism, as established in Conference of the Parties decision16/32, and believes that the comments submitted will provide valuable input to the Subsidiary Body on Scientific, Technical and Technological Advice, the Subsidiary Body on Implementation, and ultimately to the Conference of the Parties.

We trust that these contributions will advance the collective understanding and progress toward achieving the Kunming-Montreal Global Biodiversity Framework's goals.

Sincerely,

Dr. Alicia Mastretta-Yanes
Deputy Chair
Coalition for Conservation Genetics
