**Subject: Submission of information related to detection and identification of
living modified organisms – reference Notification 2026-010**

Dear Madam, Dear Sir,

Please, accept a submission of information related to detection and identification of living modified organisms as invited in the Notification No. 2026-010 from the Republic of Slovenia.

The colleagues from National institute of biology, Slovene NLR for the detection and identification of LMOs, recently published an article titled:

Simple, fast, reliable: multiplex digital PCR quantification of 19 genetically modified soybean events; [Amadej Jelenčič](#), [Dejan Štebih](#), [Tina Demšar](#) & [David Dobnik](#); 27 Feb 2026;
DOI: [10.1080/21645698.2026.2635816](https://doi.org/10.1080/21645698.2026.2635816);
<https://www.tandfonline.com/doi/full/10.1080/21645698.2026.2635816>

We believe the development of the multiplex digital PCR for the quantification of GM soybean events may be of interest for a wide circle of BCH users.

With Regards,
