Current Release Notes - Qloud

Note: If you did not upgrade using the last release(s), please be sure to read the prior release notes at the support portal in the Documentation section so you will know what has been included with this release.

Improvements in Quantrix Qloud Version 19.1.2

(none)

Significant Issues Fixed in Quantrix Qloud Version 19.1.2

Clicking Enter multiple times in a cell no longer sometimes adds newline characters in the cell (QWC-3707)

An exception no longer occurs in scenarios involving a model owner sharing with a group to which the model owner belongs and then accessing the share dialog (QWC-3741)

Model Server now manages the export of many views containing large amounts of data more efficiently in memory, resulting in lower memory usage (QWC-3771)

Known Issues in Qloud Version 19.1.2

(none)
