Please Note: Events that are booked as a public event and ones booked by the Kentucky Venues staff may not have an estimated economic impact. Estimated attendance is provided by the show organizer and estimated economic impact is calculated by Louisville Tourism. Louisville Tourism utilizes the Destinations International Event Impact Calculator (EIC) which is the official industry standard for measuring the Estimated Economic Impact (EEI) of an event. Once event specific data is entered into the system (dates, attendance, room nights, number of exhibits, etc.), the calculator uses eight different sources of industry data (including city-specific data such as average room rate) to compile a complete event impact analysis. Some events may use different study models with varying numbers for total "Economic Impact".
