

Carbon-Free Choice Program

Through the Carbon-Free Choice Program, customers in KYMEA All Requirements Communities can purchase carbon-free energy sourced from KYMEA solar and hydroelectric facilities. The carbon-free energy is sold in blocks per month where one block equal 1,000 kilowatt-hours.

Program Specifics

- The carbon-free energy is available on a first-come, first-served basis.
- There are approximately 233,000 blocks available annually.
- Eligible customers, who are in good standing, purchase the blocks from their local municipal electric provider.
- The rate per block, per month, is subject to change through the rate setting process each July.
- Each block is certified and tracked using the M-RETS tracking system.
- Program participants will receive verification the carbon-free energy was utilized and retired on their behalf.
- Whole blocks must be purchased.
- Minimum participation term is one year.
