Roche Breast and Gastrointestinal Medical Oncology Fellowship at Tom Baker Cancer Centre, Calgary, Alberta

DESCRIPTION: A one year medical oncology fellowship in breast and gastrointestinal malignancies including combination of 50% clinical work and 50% health services research. The fellow will be paid at a PGY6 salary rate and there will be no call.

REQUIREMENTS:
Residents must have completed internal medicine and medical oncology training. Candidates must be Canadian Citizens or Permanent Residents of Canada and be fluent in English.

Program Outline
The Department of Oncology at the University of Calgary is one of very few training programs to offer subspecialty training in Medical Oncology, Radiation Oncology, Surgical Oncology, Gynecologic Oncology, Palliative Medicine and Psychosocial Oncology in Canada, thereby allowing a comprehensive multidisciplinary approach to oncology. The Medical Oncology training program at the University of Calgary offers Residents the opportunity to train in one of the best centres in Canada. With a large staff to learner ratio, Residents gain vast experience clinically, but are also exposed to a diverse range of research interests.

Examples of publications from resident research projects (resident name in bold):

The following are required for application to the program and should be emailed to patricia.tang@ahs.ca:

Curriculum Vitae

3 Letters of Reference

Short-listed candidates will be interviewed.
