

# Overwraps

IN-PACK | ON-PACK | FOOD GRADE | MEDICAL GRADE

## Overwrapping features:

Overwrapping seals printed materials, game pieces, product samples, or other items in clear or printed film to protect them or to aid in merchandising.

## Custom-tailored constructions:

- FDA approved food-contact barriers
- Medical-grade films
- Dust, oil, water, and grease-resistant barriers
- Security features to help prevent tampering
- Easy-open options
- Materials that allow the overwrapped piece to be glued in or onto a package
- Packaging of a dimensional item for any use, including merchandising
- Available in thin to very thick films, tailored to the application
- Printed or unprinted clear or colored film

## Overwrap formats:(see back)

- **Finseal**
- **TUCK-PACK™**
- **E-PACS**
- **Hole punch**
- **KleenSeal™**

## Supply options:

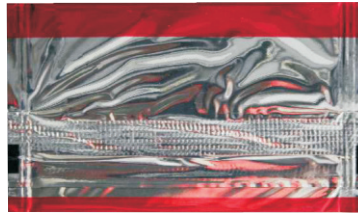

- **Bulk scatter packed**
- **Soldier stacked in trays**
- **Fanfolded bandoliers in cartons**
- **Perforated or continuous**

# Overwrap Constructions

## Finseal

Finseal is the most common overwrap. A fin of overwrap material protrudes beyond the contents on both ends. Typical materials include BOPP (polypropylene) LDPE (low density polyethylene), and shrink wrap.

Film may be clear, colored, or metallized, printed or unprinted.

## TUCK PACK™

This overwrap has the fins folded over and sealed to the back of the package. It provides a neater appearance and an overall size that is closer to that of the contents. Typical material is 80 or 100 gauge BOPP film.

Film may be clear, colored, or metallized, printed or unprinted.

## E-PACS™

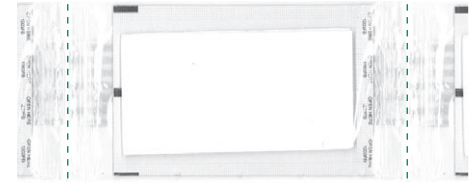

E-PACS is a Finseal overwrap provided individually tray packed or in a continuous format in fanfolded cartonpacked bandoliers for automatic application.

There is a pressure sensitive strip added to the back.

Film may be clear, colored, or metallized, printed or unprinted.

## Hole punch

The hole punch format overwrap utilizes a traditional finseal overwrap with oriented polypropylene film. The end seal incorporates a sombrero punch for hanging. It is constructed of 140-gauge BOPP.

Film may be clear, colored, or metallized, printed or unprinted.

## KleenSeal™

The KleenSeal™ overwrap is a fully enclosed pack without the fins. It features tight-tolerance end seals. It can be constructed of BOPP or shrink films.

Film may be clear, colored, or metallized, printed or unprinted.

Our years of experience will help you maximize your overwrap effectiveness.
