

Instructions & Tips:

- Print this page at the **actual size** (100%) on 8-1/2" x 11" plain paper. DO NOT use settings that re-size the page, such as “Shrink to Fit” or “Fit to Page.” **When printed, this box should measure 1" x 1".**
- 

1" x 1"
- Cut out the template along the dotted lines.
 - You will need to cut EIGHT FABRIC PIECES for an 8-segment “Elements” ornament.
 - **The pattern on ALL of your fabric pieces should ALWAYS be facing UP when you cut them.**
 - If you are using a pre-marked Elements soft foam ball from the OG Supply Shop... OR if you drew your own guidelines that curve up toward the right (usually if you’re left-handed) and then back around to the left (as shown in the eBook tutorial)... Make sure the template’s FRONT SIDE faces UP as you cut your fabric pieces.
 - OR... If you drew your guidelines up toward the left (usually if you’re right-handed) and then back around to the right... Make sure the template faces DOWN when cutting your fabric pieces.
 - Remember: You can cut your fabric pieces a little larger than this template if you want to. It’s always better for pieces to be too big vs. too small. And if you drew guidelines freehand, the sections won’t be exactly the same size, so cutting bigger pieces may help. (You can always trim away any excess!)
