

The Cure for Your *Poa*

PoaCure® SC is a pre- and post-emergence herbicide that will selectively control annual bluegrass (*Poa annua* var. *annua*), perennial type of annual bluegrass (*Poa annua* var. *reptans*), and roughstalk bluegrass (*Poa trivialis*) in various established golf course turf including creeping bentgrass putting greens and fairways and other turf areas consisting of various cool and warm season turfgrasses.

Can Be Widely Used on A Golf Course

- Greens
- Approaches
- Tees
- Fairways
- Roughs

Controls *Poa annua* and *Poa triv*

Slow & Near Complete Conversion

RECOMMENDED PROGRAMS

- 🌿 Greens 1 - 6 applications per year
0.6 fl.oz/M (0.2 gal/A) for Greens height

- 🌿 Fairways/Roughs 1 - 6 applications per year
1.2 fl.oz/M (0.4 gal/A) for Fairways height & etc

- 🌿 Two to Three weeks application interval

- 🌿 Maximum number of application varies depending on regions (Please see label for details)

PACKAGE

- 🌿 One bottle (16 fl oz) is good for six applications on 4,400 ft² putting greens
- 🌿 One case (20 bottles of 16 fl oz, 2.5 gallons) is good for six applications on 2 acres of putting greens or four applications on 1.5 acres of fairways* (*Fairway heights or higher: Green surrounds, tees, fairways and roughs)

The Cure for Your *Poa*

LEXINGTON, KENTUCKY

VIENNA, VIRGINIA

- ◆ **What is PoaCure® SC's active ingredient, and how does it work?**
PoaCure® SC's active ingredient is Methiozolin. It inhibits fatty acid thioesterase (FAT), an enzyme in lipid biosynthesis in plants.
- ◆ **Does PoaCure® SC control any other weed besides *Poa*?**
PoaCure® SC provides pre-emergence control of crabgrass (*Digitaria* spp.) and goosegrass (*Eleusine indica*).
- ◆ **Does PoaCure® SC suppress *Poa* seedheads?**
Yes, PoaCure® SC has strong seedhead suppression activity.
- ◆ **When should I apply PoaCure® SC on cool-season grass?**
PoaCure® SC should be applied when *Poa* and other turfgrasses are actively growing.
- ◆ **Can I tank-mix with PoaCure® SC?**
We do not recommend tank-mix with other products.
- ◆ **How much do I need to water after the PoaCure® SC application?**
Immediate post-irrigation is required; the amount (0.1 to 0.5 inch) varies depending on the height of the cut and turfgrass species.
- ◆ **Can I use other PGRs while using PoaCure® SC?**
During application sequences of PoaCure® SC, stop using any class B PGRs (Paclobutrazol and Flurprimidol).
- ◆ **How long do I wait to apply PoaCure® SC after seeding?**
Typically 12 weeks; wait until desirable turfgrass matures.
- ◆ **What is the typical PoaCure® SC program on greens and fairways?**
We recommend two-three years of a curative program which includes four to five applications per year.
