INVENT

Anything you can imagine

MAX INVENTION POTENTIAL.

The Pro Library is the largest collection of Bits you can get. It's designed to unleash creativity in your classroom, library, or makerspace. Create an invention, then add a new Bit and see what happens. Prepare to be amazed!

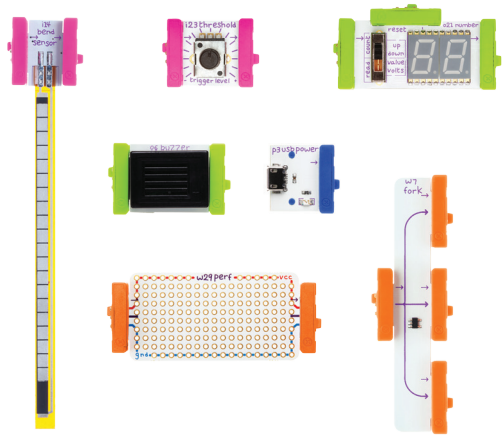

WE GROW WITH YOU.

littleBits has **LOW FLOORS**, **HIGH CEILINGS**, and **WIDE WALLS**. That means it provides a low barrier to entry, supports high-level, complex projects, and appeals to a wide variety of people.

"littleBits is one of the rare products that succeeds along all three dimensions."
