

EXAM REVIEW

Testing Center

- Make sure you know where it is
- Get there early
- Bring your final revision sheets
- Photo ID & your reservation
- Read everything from the CMTA
- You can bring a simple non-programmable calculator (maybe)
- You'll put everything into a locker

Night Before

- Get a good night's sleep
- Do not cram
- Eat healthy

Exam Strategy

1. Run through and answer all easy and obvious questions.
 - If it takes more than 20 seconds to answer, then “Mark” it
 - You should get well over half way done with good studying and good knowledge
2. At the end, work out how much time you have left to answer the amount of marked questions you have left.
 - Be sure to manage your time well to be sure each question has an equal chance at being answered.

Marking questions for later review

Your score is determined by the number of questions you answer correctly. Therefore it is to your advantage to answer every question. If you are unsure of your answer, you can mark the question to review if time permits.

To mark a question
Click the **Mark** button.

MARK

To unmark a question
Click the **Mark** button. This button will only appear if you have marked the question.

MARKED

Unmark each question when you are satisfied with your answer choice. If you forget to unmark the question, it's OKAY. The scoring process does not differentiate between marked and unmarked questions.

You can also leave a question unanswered (incomplete). Marked and Incomplete questions will be highlighted in a Review Questions screen before you exit the exam, and you will have the opportunity to go back to those if you have time remaining.

Click on the 'Next' button to continue.

Exam Strategy

3. Review marked questions
 - Write on paper the question number and ABCD
 - Look for what is false and cross through those letters
 - Process of elimination and time should help
4. Write out on scratch paper tables or formulas as required
5. Make sure all questions are answered
6. Review all answers if you have time
 - Don't change the answer unless you see a word you have missed the first time like "is not" instead of "is"

Hard Questions

- Don't panic
- Start noting down what you know
- Eliminate what is false
- Guess as a last resort
