

JOURNEY TO MORE PARS

Read it...Roll It...Hole It

More **PARS** System for Reading the Green

Putt Accuracy Read & Speed

- ❶ **Find the Low Point.** If you poured a bucket of water where would the water flow? That's the low point.
- ❷ **Cut the hole in half** to assess the amount of break.
- ❸ **Behind the hole** focus on the second half of the putt. What will the putt do as it approaches the hole - this is where it will break most.

Let's go for a walk

I received a great tip from my Pro when I was struggling with reading the green.

"Let's go for a walk." he said. We walked the line up and around the flag. He asked as we were walking towards the hole:

"Which foot feels lower?"

"Are you climbing Mt. Everest, or walking down the mountain?"

- ❹ Lastly, from **behind the ball** to assess the first half of the putt.
