I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet loupe and binocular microscope, master color comparison system, non-contact-optical measuring device, and such other instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. *The gem and or article of jewelry will be micro-photographed resulting in an enlarged photograph, as to allow detail to be easily observed. This photograph is representative of the gemstone or jewelry inspected. IT MAY NOT BE YOUR INDIVIDUAL ARTICLE.
