The laboratory grown diamond described in this report has been graded, tested, analysed, examined and/or inscribed by international Gernological Institute (IRI), Laboratory grown diamonds are diamond crystals created by scientific means and representing essentially all physical, chemical and optical characteristics of natural diamonds. Icl employs and utilizes those techniques and equipment currently variable to ICI including without irriintations: Diamond/lew, Diamonds/ue, FIRI spettoscopy, IV VIS NIR

This Chemical Vapor Deposition (CAVD) ectrometer, EDXRF spectroscopy, PL (RAWAN) spectrometers.

laboratory grown diamond is classified as

Type IIa

LABGROWN IGI LG365965609

O-m Security features included in this document are hologram, watermarked paper and additional features not listed, that, as a composite, exceed industry security standards.
