This Chemical Vapor Deposition (CVD)
laboratory grown diamond is classified

The Laboratory Grown Diamond (LGD) described in this Report has been analysed, graded, and Lass-Gaibedti by International Gemological Institute (GD). A LGD has issentially the same chemical physical and optical properties at a mitted diamond, with the exception of being imma-mode (a manufactured product). LGD's per hipsoilly produced by CVD (chemical vapor deposition) or by HPHT (high pressure high properties) of the control of the contr

This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa
