THIS DOCUMENT WAS PRODUCED WITH THE FOLLOWING SECURITY MEASURES: SPECIAL DOCUMENT PAPER, INK SCREENS, WATERMARK BACKGROUND DESIGNS, HOLOGRAM AND OTHER SECURITY FEATURES NOT LISTED AND DO EXCEED DOCUMENT SECURITY INDUSTRY GUIDELINES.

roduct). LGD's are typically produced by CVD (chemical vagor deposition) or by HPT (high pressure high emperature) growth processes and may include post-growth modifications to change the color. IGI utilize the most advanced techniques and equipment currently available including, binocular microscopes diamond color masters, non-contact-optical measuring devices, a wide range of analytical techniques inclusting FIIR. UV-VIS-NIIR, raman spectroscopy, and fluorescence analysis at various excitation vavelengths this Report includes advanced security features. This Report is neither a guarantee, valuation nor approximant of ymaking this report IGI does not agree to punchase or replace the article.

This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa

he Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded, and aserSaribed® by International Gemological Institute (IGI). A LGD has essentially the same chemical, physica

and optical properties as a mined diamond, with the exception of being man-made (a manufacture
