THIS DOCUMENT WAS PRODUCED WITH THE FOLLOWING SECURITY MEASURES: SPECIAL DOCUMENT PAPER, INK SCREENS, WAITERMARK BACKGROUND DESIGNS, HOLOGRAM AND OTHER SECURITY FEATURES NOT LISTED AND DO EXCEED DOCUMENT SECURITY INDUSTRY GUDELINES.

IGI LABORATORY GROWN DIAMOND ID REPORT

IGI Report Number	
	LG395956483
Report Date	November 5, 2019
Shape	ROUND BRILLIANT
Carat Weight	0.53 Carat
Color Grade	G
Clarity Grade	VS 1
Cut Grade	IDEAL
Polish	EXCELLENT
Symmetry	VERY GOOD
Fluorescence	NONE
Inscription(s)	LABGROWN IGI

This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified

The Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded, and Lasedaribed by international Gemological Institute (GG). A LGD has essentially the same chemical physical producth LGD's are spracy produced by CVV (orhermical vapor describinor) or by HPHT (high pressure spin producth LGD's are spracy produced by CVV (orhermical vapor describinor) or by HPHT (high pressure spin temperature) growth processes and may include past-growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently available including, binacular microscopes diamond color masters, non-contact-patical measuring devices, a wide range of analytical techniques including FIII & VVI-SI-NR, range specificacy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approsal and by making this report field does not agree to purchase or replace the article.
