IGI LABORATORY GROWN DIAMOND ID REPORT

IGI Report Number

IGI GEMOLOGICAL REPORT

IGI LABORATORY GROWN DIAMOND	GRADING REPORT
Report Date	November 21, 2019
IGI Report Number	LG395981799
Shape and Cutting Style	PRINCESS CUT
Measurements	4.78 X 4.70 X 3.25 MM
GRADING RESULTS	
Carat Weight	0.63 Carat
Color Grade	The second s
Clarity Grade	VS 1

ADDITIONAL GRADING INFORMATION

Polish		EXCELLENT
Symmetry		EXCELLENT
Fluorescence		NONE
Inscription(s)		LABGROWN IGI LG395981799
Comments:	This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa	

The Laboratory Grown Diamond (LGD) described in this Report has been analysed, graded, and LassSchedtil by International Gemological Institute (GR). A LGD has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product), LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth, processes and may include padgrowth modifications to change the color. (GI utilises the ment advanced techniques and equipment currently available including, binocular microscopes, including FIIR, UV-VIS-NR, ramon spectroscopy, and fluorescence analysis at vatious excitation wavelengths. This Report Includes advanced security features. This Report is nettier a guarantee, valuation no approad and by making this report (GI does not agree to purchase or replace the anticis. © INTERNATIONAL GEMOLOGICAL INSTITUTE, INC. CEMOLOCICA
