IGI GEMOLOGICAL REPORT

IGI LABORAT	ORY GROWN DIAMOND GRADING RE	PORT
Report Date		December 30, 2019
IGI Report Nun	nber	LG400937935
Shape and Cu	tting Style	ROUND BRILLIANT
Measurements		4.77 - 4.84 X 2.88 MM
Carat Weight		0.39 Carat
Color Grade		G
Clarity Grade		VS 2
Cut Grade		IDEAL
ADDITIONAL	GRADING INFORMATION	
Polish		EXCELLENT
Symmetry		EXCELLENT
Fluorescence		NONE
Inscription(s)	LABO	ROWN IGI LG400937935
Comments:	This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa	

The Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded, and Lass&othedd by International Gemological Institute (GR), A LGD has essentially the same chemical physical and optical properties as a mined diamond with the exception of being man-made (a manufactureal product), LGD's are tyrically produced by CVD (chemical vapor depation) or by HHT (high pressure high temperature) growth processes and may include postgrowth modifications to change the color. (Gi utilise the meret advanced techniques and equipment currently available including binccular microscopes, adamand calor matters, non-contrad-optical measuring devices, a wide range of analytical techniques including FIIR, UV-VE-NR; roman spectroscopy, and fluorescence analysis of various excitation wavelengths. This Report Includes advanced security features. This Report in setters a utilization and approach and by making this report (G) does not agree to purchase or replace the actia. © INTERMANDIVAL GEMOLOGICAL INSTITUET: DCC © INTERNATIONAL GEMOLOGICAL INSTITUTE
