The laboratory grown diamond described in this Report (Report) has been graded tested, analysed swammed and/or inscribed by International Gerenological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined adiamond, with the exception of being grown by man (a manufactured product). (IGL employs and utilizes those techniques and equipment currently available to I.G.J., including, without limitation, 10X magnification, conscreted implet loupe, blancular microscope, matter color comparison stones, non-contact-optical measuring device, Diamond Sue^M, Diamond View^M, Spectraphotometer and such other instruments and/or processes as deemed appropriate by I.G.I. This Report Includes advanced security features. A duly accredited gerealing of grewieer can advise you with respect to the importance or and interreliatoring between cu. color, clarity and card weight.
