Comments:	This Chemical Vapor Deposition (CVD) laborator grown diamond is classified as Type IIa	ry		

The Laboratory Grown Diamond (USD) described in this Report has been analysed, graded, and LaseScribed® by Interactional Gemological Institute (G), A LGD has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactureal product), LGD's are tyrically produced by CVD (chemical vapor deposition) or by HHT (high pressure high temperature) gravity processes and may include party-gravity modifications to change the coke. (Gi utilise the met advanced techniques and equipment currently available including, binacutor microscopes, including FIIR, UV-VE-NR, roman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report Industs advanced socutify factures. This Report is netter a guarantee, valuation nor approard and by making this report GI does not agree to purchase or replace the antice. © INTERNATIONAL GEMOLOGICAL INSTITUTE
