This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesarcinbed's by International Gemological Institute (GI). A LGD has assentially the chemical, physical and optical properties as a mined alamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (Righ pressure high temperature) growth processes and may include post growth modifications to change the color of utilizes the most advanced techniques and equipment currently available including, binacular control of the color of the col
