Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa

This Laboratory Grown Diamond (LGD) described in his Report has been analyzed, graded and Lassracified by International Gemological Institute (GI) A. LGD has assentially the chemical, physical and optical properties as a mined admond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color clid utilizes the most advanced techniques and equipment currently available including, binocular microscopes, damond color mosters, non-contact-optical measuring device, a wide range analytical excitation vavelengths. This Report includes a devinead security features. The Report is relative to quarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the article.
