The laboratory grown diamond described in this Report (Report) has been graded tested, analyzed, examined and/or inscribed by International Gemological Institute (LGL). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). [Cs.] employs and utilizes those techniques and equipment currently available to [Gs.], including, without limitation, 10X magnification, corrected to the control of the

weight.
